A 000	Initial Comments An unannounced Initial licensure survey was conducted on 1/29/2020 at W 2nd Cambridge LLC. The facility had deficiencies identified at the time of the survey.	A 000		
A 004 SS=D	59A-36.004 FAC Licensure - Requirements (1) SERVICE PROHIBITION. An assisted living facility may not represent that it provides any service other than a service for which it is licensed to provide. (2) CHANGE IN USE OF SPACE REQUIRING AGENCY CENTRAL OFFICE APPROVAL. A change in the use of space that increases or decreases a facility's capacity must not be made without prior approval from the Agency Central Office. Approval must be based on the compliance with the physical plant standards provided in rule 59A-36.014, F.A.C., as well as documentation of compliance with applicable fire safety and sanitation inspection requirements referenced in rule 59A-36.005, F.A.C. (3) CHANGE IN USE OF SPACE REQUIRING AGENCY FIELD OFFICE APPROVAL. A change in the use of space that involves converting an area to resident use, which has not previously been inspected for such use, must not be made without prior approval from the Agency Field Office. Approval must be based on compliance with the physical plant standards provided in rule 59A-36.014, F.A.C., as well as documentation of compliance with applicable fire safety and sanitation inspection standards referenced in rule 59A-36.005, F.A.C. (4) CONTIGUOUS PROPERTY. If a facility consists of more than one building, all buildings included under a single license must be on contiguous property. "Contiguous property" means property under the same ownership	A 004

A 200 SS=D	59A-36.025 FAC Emergency Environmental Control 59A-36.025 Emergency Environmental Control for Assisted Living Facilities. (1) DETAILED EMERGENCY ENVIRONMENTAL CONTROL PLAN. Each assisted living facility shall prepare a detailed plan ("plan") to serve as a supplement to its Comprehensive Emergency Management Plan, to address emergency environmental control in the event of the loss of primary electrical power in that assisted living facility which includes the following information: (a) The acquisition of a sufficient alternate power source such as a generator(s), maintained at the assisted living facility, to ensure that current licensees of assisted living facilities will be equipped to ensure air temperatures will be maintained at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours in the event of the loss of primary electrical power. 1. The required temperature must be maintained in an area or areas, determined by the assisted living facility, of sufficient size to maintain residents safely at all times and that is appropriate for resident care needs and life safety requirements. For planning purposes, no less than twenty (20) net square per resident must be provided. The assisted living facility may use eighty percent (80%) of its licensed bed capacity as the number of residents to be used in the to determine the required square footage. This may include areas that are less	A 200

A 200	Continued From page 5 than the entire assisted living facility if the assisted living facility's comprehensive emergency management plan includes allowing a resident to congregate when he or she desires in portions of the building where temperatures will be maintained and includes procedures for monitoring residents for signs of heat related injury as required by this rule. This rule does not prohibit a facility from acting as a receiving provider for evacuees when the conditions stated in section 408.821, F.S. and subsection 59A-36.019(5), F.A.C., are met. The plan shall include information regarding the area(s) within the assisted living facility where the required temperature will be maintained. 2. The alternate power source and fuel supply shall be located in an area(s) in accordance with local zoning and the Florida Building Code. 3. Each assisted living facility is unique in size; the types of care provided; the physical and mental capabilities and needs of residents; the type, frequency, and amount of services and care offered; and staffing characteristics. Accordingly, this rule does not limit the types of systems or equipment that may be used to achieve temperatures at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours in the event of the loss of primary electrical power. The plan shall include information regarding the systems and equipment that will be used by the assisted living facility and the fuel required to operate the systems and equipment. a. An assisted living facility in an evacuation zone pursuant to chapter 252, F. S. must maintain an alternative power source and fuel as required by this subsection at all times when the assisted living facility is occupied but is permitted to utilize a mobile generator(s) to enable portability if evacuation is necessary.
