A 030	Continued From page 6 failed to ensure that its Control Policy addressed the screening process of visitors and that staff followed this process for all persons entering the facility. The findings included: A recertification survey was conducted at the facility on Upon arriving at the facility, Employee A requested to take the Surveyor's temperature before allowing him into the facility. Thereafter, Employee A asked the Surveyor to wash his and indicated that was the facility's protocol. Then, she ushered the Surveyor to a desk where the survey process would be conducted. Review of the resident's roster revealed that there were five residents at the facility identified as Residents #1 through #5. In a brief interview on at 9:30 AM, Employee A reported, when questioned about the screening process, that what she did was all that was required before allowing visitors into the facility. At 10:26 AM, the Administrator arrived at the facility and was not screened by anyone, her temperature was not taken. The Administrator was immediately interviewed regarding control. She admitted that got carried away, that is why she forgot to have her temperature checked. She then reported that to ensure the residents don't get with COVID, they practice universal precaution. They were testing all employees and residents every two weeks, until it was no longer required, she added. However, they have the emergency kit to conduct the test in case someone shows signs and	A 030

A 030	Continued From page 7 symptoms, she continued. Furthermore, the Administrator reported that the main screening they now do consists in taking everyone's temperatures and to have them wash their hands. Initially no one was allowed at the facility, but we now allow family members to visit after screening them and ask them to stay for no more than 20 minutes. The Administrator also said that she asks visitors if they have been in contact with people with COVID and if they have recently travelled outside of the country. She continued and said before they were stricter, but now with the lessening of the rules, they have been more flexible. She said that she does not keep a copy of the screening questions. The Administrator also indicated that most of the residents' family members live out of town and do not come to the facility. She said that aside from hospice, she has a home health company representative who comes to the facility. Hospice sends the COVID test results of the nurse. The Administrator added that Hospice service providers would advise them if their staff were not safe to perform their visit. "The home health company also informs us of the test results of the staff. No evidence of such was provided upon request. At 10:30 AM, it was observed that the hospice Nurse arrived at the facility. Her temperature was taken, but no one asked her any other screening questions. The Nurse went to the bathroom to wash her hands and proceeded to the resident's room wearing only a mask. According to the updated CDC guidelines dated 11/16/2020, all visitors allowed to enter the facility must undergo a screening process that includes questions related to whether they have been in	A 030

A 200	Continued From page 19 requirements. For planning purposes, no less than twenty (20) net square per resident must be provided. The assisted living facility may use eighty percent (80%) of its licensed bed capacity as the number of residents to be used in the to determine the required square footage. This may include areas that are less than the entire assisted living facility if the assisted living facility's comprehensive emergency management plan includes allowing a resident to congregate when he or she desires in portions of the building where temperatures will be maintained and includes procedures for monitoring residents for signs of heat related injury as required by this rule. This rule does not prohibit a facility from acting as a receiving provider for evacuees when the conditions stated in section 408.821, F.S. and subsection 59A-36.019(5), F.A.C., are met. The plan shall include information regarding the area(s) within the assisted living facility where the required temperature will be maintained. 2. The alternate power source and fuel supply shall be located in an area(s) in accordance with local zoning and the Florida Building Code. 3. Each assisted living facility is unique in size; the types of care provided; the physical and mental capabilities and needs of residents; the type, frequency, and amount of services and care offered; and staffing characteristics. Accordingly, this rule does not limit the types of systems or equipment that may be used to achieve temperatures at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours in the event of the loss of primary electrical power. The plan shall include information regarding the systems and equipment that will be used by the assisted living facility and the fuel required to operate the systems and equipment.	A 200
