A 200	59A-36.025 FAC Emergency Environmental Control 59A-36.025 Emergency Environmental Control for Assisted Living Facilities. (1) DETAILED EMERGENCY ENVIRONMENTAL CONTROL PLAN. Each assisted living facility shall prepare a detailed plan ("plan") to serve as a supplement to its Comprehensive Emergency Management Plan, to address emergency environmental control in the event of the loss of primary electrical power in that assisted living facility which includes the following information: (a) The acquisition of a sufficient alternate power source such as a generator(s), maintained at the assisted living facility, to ensure that current licensees of assisted living facilities will be equipped to ensure air temperatures will be maintained at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours in the event of the loss of primary electrical power. 1. The required temperature must be maintained in an area or areas, determined by the assisted living facility, of sufficient size to maintain residents safely at all times and that is appropriate for resident care needs and life safety requirements. For planning purposes, no less than twenty (20) net square feet per resident must be provided. The assisted living facility may use eighty percent (80%) of its licensed bed capacity as the number of residents to be used in the facility to determine the required square footage. This may include areas that are less than the entire assisted living facility if the assisted living facility's comprehensive emergency management plan includes allowing a resident to congregate when he or she desires in portions of the building where temperatures will be maintained and includes procedures for monitoring residents for signs of heat related injury as required by this rule. This rule does not	A 200

A 200	Continued From page 1 prohibit a facility from acting as a receiving provider for evacuees when the conditions stated in section 408.821, F.S. and subsection 59A-36.019(5), F.A.C., are met. The plan shall include information regarding the area(s) within the assisted living facility where the required temperature will be maintained. 2. The alternate power source and fuel supply shall be located in an area(s) in accordance with local zoning and the Florida Building Code. 3. Each assisted living facility is unique in size; the types of care provided; the physical and mental capabilities and needs of residents; the type, frequency, and amount of services and care offered; and staffing characteristics. Accordingly, this rule does not limit the types of systems or equipment that may be used to achieve temperatures at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours in the event of the loss of primary electrical power. The plan shall include information regarding the systems and equipment that will be used by the assisted living facility and the fuel required to operate the systems and equipment. a. An assisted living facility in an evacuation zone pursuant to chapter 252, F. S. must maintain an alternative power source and fuel as required by this subsection at all times when the assisted living facility is occupied but is permitted to utilize a mobile generator(s) to enable portability if evacuation is necessary. b. Assisted living facilities located on a single campus with other facilities under common ownership, may share fuel, alternative power resources, and resident space available on the campus if such resources are sufficient to support the requirements of each facility's residents, as specified in this rule. Details regarding how resources will be shared and any	A 200

A 200	Continued From page 2 necessary movement of residents must be clearly described in the emergency power plan. c. A multistory facility, whose comprehensive emergency management plan is to move residents to a higher floor during a flood or surge event, must place its alternative power source and all necessary additional equipment so it can safely operate in a location protected from flooding or storm surge damage. (b) The acquisition of sufficient fuel, and safe maintenance of that fuel at the facility, to ensure that in the event of the loss of primary electrical power there is sufficient fuel available for the alternate power source to maintain temperatures at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours after the loss of primary electrical power during a declared state of emergency. The plan must include information regarding fuel source and fuel storage. 1. Facilities must store minimum amounts of fuel onsite as follows: a. A facility with a licensed capacity of 16 beds or less must store 48 hours of fuel onsite. b. A facility with a licensed capacity of 17 or more beds must store 72 hours of fuel onsite. 2. An assisted living facility located in an area in a declared state of emergency area pursuant to section 252.36, F.S. that may impact primary power delivery must secure ninety-six (96) hours of fuel. The assisted living facility may utilize portable fuel storage containers for the remaining fuel necessary for ninety-six (96) hours during the period of a declared state of emergency. 3. Piped natural gas is an allowable fuel source and meets the onsite fuel supply requirements under this rule. 4. If local ordinances or other regulations limit the amount of onsite fuel storage for the assisted	A 200

For purposes of this section, "readily available" means the ability to immediately produce the notifications, either in electronic or paper format, upon request. This Statute or Rule is not met as evidenced by: Based on interview and observation, the facility failed to maintain fuel in order to operate the emergency generator stored on site. The findings include: On at 10:15 am, an observation of the facility's generator was conducted with the Maintenance Manager. The generator was located outside in a gated area near the facility. In a storage unit next to the generator, the six empty plastic fuel containers were observed. The Maintenance Manager confirmed there was no fuel in the plastic containers because he did not want the fuel to go bad. A review of the facility emergency management plan was conducted. The plan revealed that 72 hours of fuel (gasoline) was to be stored on the facility premises. A question on the plan asked if there was a local restriction of the amount of fuel that could be stored on the facility site. The answer was no. When asked about fuel storage,	A 200

A 008	Continued From page 14 emergency placement must be entered on the facility's admission and discharge log and counted in the facility census. A facility may not exceed its licensed capacity in order to accept such a resident. A medical examination must be conducted on any temporary emergency placement resident accepted for regular admission. This Statute or Rule is not met as evidenced by: Based on record review and staff and resident interview the facility failed to obtain a new Health Assessment for 1 of 6 sampled residents transferred from another assisted living facility (Resident #3). The findings include: During an interview with Resident #3 on at 10:05 am he was asked how long he had been at the facility. He said he was moved here in after discharging from the facility's separately licensed sister community. Resident #3's records showed an 1823 completed in with no new assessment closer to his admission date. An interview was conducted with the Executive Director on at 3:05pm about his move from one facility to another. She confirmed she did not obtain a new 1823 health assessment when he was transferred.
