(a) Each assisted living facility shall develop and implement written policies and procedures to ensure that the assisted living facility can effectively and immediately activate, operate and maintain the alternate power source and any fuel required for the operation of the alternate power source. The procedures shall ensure that residents do not experience complications from fluctuations in air temperatures inside the facility. Procedures must address the care of residents occupying the facility during a declared state of emergency, specifically, a description of the methods to be used to mitigate the potential for heat related injury including: 1. The use of cooling devices and equipment; 2. The use of refrigeration and freezers to produce ice and appropriate temperatures for the maintenance of medicines requiring refrigeration; 3. Wellness checks by assisted living facility staff to monitor for signs of dehydration and heat injury; and 4. A provision for obtaining medical intervention from emergency services for residents whose life safety is in jeopardy. (b) Each assisted living facility shall maintain the written policies and procedures in a manner that makes them readily available at the licensee's physical address for review by a legally authorized entity. If the policies and procedures are maintained in an electronic format, assisted living facility staff must be readily available to access the policies and procedures and produce the requested information. For purposes of this section, "readily available" means the ability to immediately produce the policies and procedures, either in electronic or paper format, upon request.	{A 200}
