This Statute or Rule is not met as evidenced by: Based on record review and interview, the facility failed to develop policies and procedures to direct staff on how to care for the six residents of the facility during power loss. The findings include: On _____, an observation was made of the facility's fixed generator at 12:57 pm. There were 2 large fuel tanks located near the fixed generator. The facility's emergency power plan was reviewed which showed the generator took gasoline, not propane. It explained the generator held 12 gallons and ran for 6.4 hours per tank. Nowhere in the policy did it instruct staff on performing wellness checks, on how to manage refrigerated medications, or a provision for obtaining assistance from emergency services as emergencies arise. Photographic evidence obtained. The Administrator confirmed at 1:20 pm on _____, she confirmed the generator took propane, not gas, and had a much larger capacity than what was listed. She explained there were no other policies other than what was provided. Class III	A 200
