On at 3:55 PM, during a telephone interview, the Administrator acknowledged that the staff did not have First Aid training. Class III	A 083			
A 200 SS=G	59A-36.025 FAC Emergency Environmental Control 59A-36.025 Emergency Environmental Control for Assisted Living Facilities. (1) DETAILED EMERGENCY ENVIRONMENTAL CONTROL PLAN. Each assisted living facility shall prepare a detailed plan ("plan") to serve as a supplement to its Comprehensive Emergency Management Plan, to address emergency environmental control in the event of the loss of primary electrical power in that assisted living facility which includes the following information: (a) The acquisition of a sufficient alternate power source such as a generator(s), maintained at the assisted living facility, to ensure that current licensees of assisted living facilities will be equipped to ensure . . . air temperatures will be maintained at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours in the event of the loss of primary electrical power. 1. The required temperature must be maintained in an area or areas, determined by the assisted living facility, of sufficient size to maintain residents safely at all times and that is appropriate for resident care needs and life safety	A 200

A 200	Continued From page 2 requirements. For planning purposes, no less than twenty (20) net square per resident must be provided. The assisted living facility may use eighty percent (80%) of its licensed bed capacity as the number of residents to be used in the to determine the required square footage. This may include areas that are less than the entire assisted living facility if the assisted living facility's comprehensive emergency management plan includes allowing a resident to congregate when he or she desires in portions of the building where temperatures will be maintained and includes procedures for monitoring residents for signs of heat related injury as required by this rule. This rule does not prohibit a facility from acting as a receiving provider for evacuees when the conditions stated in section 408.821, F.S. and subsection 59A-36.019(5), F.A.C., are met. The plan shall include information regarding the area(s) within the assisted living facility where the required temperature will be maintained. 2. The alternate power source and fuel supply shall be located in an area(s) in accordance with local zoning and the Florida Building Code. 3. Each assisted living facility is unique in size; the types of care provided; the physical and mental capabilities and needs of residents; the type, frequency, and amount of services and care offered; and staffing characteristics. Accordingly, this rule does not limit the types of systems or equipment that may be used to achieve temperatures at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours in the event of the loss of primary electrical power. The plan shall include information regarding the systems and equipment that will be used by the assisted living facility and the fuel required to operate the systems and equipment.	A 200

A 200	Continued From page 3 a. An assisted living facility in an evacuation zone pursuant to chapter 252, F, S. must maintain an alternative power source and fuel as required by this subsection at all times when the assisted living facility is occupied but is permitted to utilize a mobile generator(s) to enable portability if evacuation is necessary. b. Assisted living facilities located on a single campus with other facilities under common ownership, may share fuel, alternative power resources, and resident space available on the campus if such resources are sufficient to support the requirements of each facility's residents, as specified in this rule. Details regarding how resources will be shared and any necessary movement of residents must be clearly described in the emergency power plan. c. A multistory facility, whose comprehensive emergency management plan is to move residents to a higher floor during a flood or surge event, must place its alternative power source and all necessary additional equipment so it can safely operate in a location protected from flooding or storm surge damage. (b) The acquisition of sufficient fuel, and safe maintenance of that fuel at the facility, to ensure that in the event of the loss of primary electrical power there is sufficient fuel available for the alternate power source to maintain temperatures at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours after the loss of primary electrical power during a declared state of emergency. The plan must include information regarding fuel source and fuel storage. 1. Facilities must store minimum amounts of fuel onsite as follows: a. A facility with a licensed capacity of 16 beds or less must store 48 hours of fuel onsite.	A 200

A 200	Continued From page 10 the licensee's physical address for review by a legally authorized entity. Findings included: On at 10:10 AM, observation showed a portable gasoline fuel generator Generac GP17500E and 7 tanks of 5 gallons filled with gasoline (total 35 gallons) stored inside a shed on the facility patio. Review of the generator manual showed it had 16 gallons tank capacity and will run 10 hours at 50%. The facility would need approximately 76.8 gallons of gasoline for a minimum of 48 hours. The 35 gallons of gasoline the facility had would only last approximately 21.8 hours. Additionally, review of facility records showed no documentation of the facility emergency plan. On at 2:44 PM, during a telephone interview, the Administrator stated that the facility only had 35 gallons of gasoline. She stated the consultant told her that according to the generator manual 35 gallons is the amount needed. The Administrator stated that there was no local ordinance or other restriction that prohibits additional fuel storage. The Administrator further stated the consultant had the emergency plan documentation was and she did not have a copy at the facility. Class II	A 200

A 032	Continued From page 14 for responding to a resident elopement. At a minimum, the policies and procedures must provide for: 1. An immediate search of the facility and premises, 2. The identification of staff responsible for implementing each part of the elopement response policies and procedures, including specific duties and responsibilities, 3. The identification of staff responsible for contacting law enforcement, the resident's family, guardian, health care surrogate, and case manager if the resident is not located pursuant to subparagraph (8)(b)1.; and, 4. The continued care of all residents within the facility in the event of an elopement. (c) Facility Resident Elopement Drills. The facility must conduct and document resident elopement drills pursuant to Section 429.41(1)(k), F.S. This Statute or Rule is not met as evidenced by: Based on interview and record review, the facility failed to develop detailed written policies and procedures for responding to a resident elopement. Also, the facility failed to conduct and document resident elopement drills. Findings included: Review of facility records showed no documentation of the facility policies and procedures regarding elopement. Further review showed no documentation the facility had conducted any elopement drills. On at 2:44 PM, during a telephone interview, the Administrator stated that she had never done elopement drills because none of the residents were at risk for elopement.	A 032
