A 030	Continued From page 6 Findings included: Interviewed on between 9:00 am and 3:00 pm, a conversation with the Director of Resident Services, The Administrator and the Executive Director revealed that there were cameras in the bedrooms and living rooms of the 24 memory care units. According to these facility management personnel, the cameras were a part of the prevention program. The Director of Resident Services stated that the cameras were not activated to record unless a resident dropped beneath the camera's field of view. If this happened, the authorized managers were notified by telephone. In addition, a recording of the events ten minutes before and ten minutes after the potential was emailed to these managers and retained on a cloud-based server. He further stated that if there was no possible identified in a unit, the recordings were purged from the system after 24 hours. A review of consent forms for the detection program revealed no documentation that residents were informed about the parameters of the recording, where and for how long recordings would be retained, or who would access the recordings and for what reason. The document did not inform residents that they were continuously recorded. The manufacturer's written advice showed that all event recordings would be retained rather than events recordings only being retained. Further review found no documentation of how residents who declined the service would be assured that they were not recorded at any time. There was no documentation about how the facility would demonstrate that it had deactivated cameras in units where the resident had declined to use the video monitoring program.	A 030
