The findings included:

On at 12:00 p.m., the serving of the noon meal was observed. A dated weekly menu was not observed to be posted. There was observed a dated daily menu posted on the wall just outside the dining . The daily menu noted the noon lunch meal was to be soup du jour, toasted ham and swiss on rye, California mix vegetables, Garbanzo Bean salad, and a brownie. This was observed to be the meal that was served.

On at 12:30 p.m., the Dietary Manager said they do not post a weekly date poster. The facility posts a daily menu of what is being served. These menus are discarded at the end of each day. They work off a 4 week cycle menu. He said that they are on week 2 of the cycle. The noon meal for Tuesday noon was, soup du Jour, ham and cheese on rye with tomatoes and lettuce leaves, and marinated cucumber salad. Also to be served was 1/2 cup of canned or fresh fruit. This was to be served with low fat milk, beverage, and condiments. The Dietary Manager said we did not serve the fruit and we do not serve milk. We did not receive the tomatoes or lettuce so we could not add those items to the meal. We did not serve the cucumber salad. We served Garbanzo Bean Salad. The 4 week cycle menus provided by the Dietary Manager was signed and dated on . He said they do not have menus reviewed and approved in the last 12 months.

On at 1:10 p.m., resident aid A on the second floor said we do not serve milk with meals. She said they serve fruit to the residents only if it is on the daily menu.

On at 1:40 p.m., the Registered Dietitian who signed the facility's menu said this was the last time the menu reviewed and signed.
