Based on observation and staff interview, the facility failed to maintain their call light system that is located in the residents' bathrooms.

The findings included:

On at 9:21 a.m., Resident #1's call light cord was pulled in her bathroom. At 9:35 a.m., no staff answered this call light. At 9:35 a.m., Staff A and Staff B both said they did not have any notice showing Resident #1's bathroom call light was on. They said their i-pods give them the notice when a resident pulls the cord in their bathrooms. They both reviewed their i-pods. Staff A and Staff B confirmed both their i-pods were not working and would not know if any resident call lights were on. Observation of these two i-pods showed the call light in Resident #1's bathroom did not notify the staff.

On at 9:40 a.m., the Administrator reviewed the computer that was mounted in the hallway. She confirmed the call light system was down. The Administrator and staff were not aware their call light systems in the resident bathrooms were not working.
