A4050	Continued From Page 1 a) Screening for Latent TB Infection 1) Persons who are contacts to suspected or confirmed cases of active TB disease shall be evaluated in accordance with the CDC Guidelines for the Investigation of Contacts. 2) Workers and clients at health care settings and other residential settings serving high-risk groups shall be screened in accordance with this subsection (a)(2) and the following CDC guidelines: Targeted Tuberculin Testing and Treatment of Latent Tuberculosis Infection; Guidelines for Health-Care Settings; Prevention and Control of Tuberculosis in Correctional and Detention Facilities: Recommendations from CDC. A) Health care workers and workers in other residential care settings shall have baseline (preplacement) TB symptom evaluation, TB test (Interferon Gamma Release Assay (IGRA) blood test or Mantoux Tuberculin Skin Test (TST)), and an individual risk assessment. Based on interview and record review, the Establishment failed to ensure employees received a two step TB test upon hire. (E3) The Establishment's Policy Manual, undated, documents, "Health Requirements: B. the Administrator and staff, including volunteers, will be free of communicable disease. All staff will be required to have a tuberculin skin test as a condition of employment or prior to commencement of volunteer service." The Establishment's staffing roster documents E3's/Food Manager's hire date as 3/25/24. E3's Personnel file has documentation of a one step TB test being completed on 3/28/24. There is no evidence of a second step being completed.	A4050			

If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
