The new resident or employee provides documented evidence of a previous positive skin test result or positive BAMT. b.) The new resident or employee provides evidence of a chest X-ray done within the last six months and physician documentation confirming the individual does not have active TB and the new person is asymptomatic. c.) Skin testing is not appropriate for a new resident due to changes in the resident's skin- an examination by a physician, PA, ARNP, including a chest x-ray must be completed within seven days of admission. d.) the new resident or employee provides satisfactory documentation of receiving the 2-step skin tests within six months prior to residency/ employment that read not positive." The policy further recorded, "Each resident and employee shall have an annual TB symptom screen that includes completion of the symptom review questionnaire."</p> <p>The administrator failed to ensure the facility remained in compliance with the department's tuberculosis guidelines for adult care homes adopted by reference in K.A.R. 26-39-105.</p> | S3310                                                                                    |                                                                                                                          |                                                        |
