F0000	INITIAL COMMENTS From 7/7/2025 through 7/9/2025, on-site visits were conducted at Maplecrest Rehab & Living Center for the purpose of a Recertification Survey and investigating ME00049346, ME00049712 and ME00052179. It was determined that Maplecrest Rehab & Living Center was not in substantial compliance with 42 CFR 483, Sub-part B Requirements for Long Term Care Facilities.		F0000				
F0584 SS = E	Safe/Clean/Comfortable/Homelike Environment CFR(s): 483.10(i)(1)-(7) §483.10(i) Safe Environment. The resident has a right to a safe, clean, comfortable and homelike environment, including but not limited to receiving treatment and supports for daily living safely. The facility must provide- §483.10(i)(1) A safe, clean, comfortable, and homelike environment, allowing the resident to use his or her personal belongings to the extent possible. (i) This includes ensuring that the resident can receive care and services safely and that the physical layout of the facility maximizes resident independence and does not pose a safety risk. (ii) The facility shall exercise reasonable care for the protection of the resident's property from loss or theft. §483.10(i)(2) Housekeeping and maintenance services necessary to maintain a sanitary, orderly, and comfortable interior; §483.10(i)(3) Clean bed and bath linens that are in good condition;		F0584				

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See reverse for further instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F0610 SS = D	Continued from page 4 blue hair dye to the ends of Resident #31's hair. When the resident left the area, CNA #5 stated "I don't like him/her". Around 12:30 p.m.- 12:45 p.m., CNA #4 observed CNA #5 transfer Resident #25 to his/her bed with a stand and pivot machine, the bed was not at appropriate level at the time, causing the resident to cry out in pain upon transfer. Per the letter Resident #25 voiced he/she did not want CNA #5 to provide him/her care. CNA#5 proceeded to climb into bed with Resident #25 and lay down with him/her. Resident #25 proceeded to "freak even more" stating "get away from me" and "don't touch me". Resident #25 then attempted to hit CNA #5, but the CNA grabbed the resident's hand and proceeded to move it like a "car shifter". CNA #4 told CNA #5 to leave the room, CNA#5 got up out of the bed and took the residents glasses away. Around 12:50 p.m.- 1:00 p.m., CNA #4 and CNA #5 were getting Resident #4 changed in bed. Resident #4 rolled toward CNA #5 and hit his leg, CNA #5 stated "don't touch my privates". Resident #4 stated he/she did not touch him there and felt CNA #5 was upset with him/her. CNA #4 needed to provide reassurance. Review of the facility investigation lacked evidence that the abuse allegations were reported immediately by CNA #4, the facility failed to report the allegations of abuse to the State Agency within 24 hours, failed to conduct a thorough investigation, and failed to report the results of the investigation within 5 days of the incident. On 7/8/25 at 9:20 a.m., during an interview, the above information was confirmed with the Director of Nursing.	F0610

F0644 SS = D	Continued from page 7 resident reviewed for PASRR (Resident #14). Review of Resident #14's Minimum Data Set 3.0 (MDS) revealed an Annual Comprehensive Assessment, dated 11/14/24 that indicates an active primary diagnosis of Dementia and an active diagnosis of Post-Traumatic Stress Disorder (PTSD). Resident #14's most recent Quarterly MDS, dated 5/6/25, also includes an active diagnosis of mood disorder and indicates Resident #14 exhibited "Physical behavioral symptoms directed towards others" and "Verbal behavioral symptoms directed toward others." Resident #14's Care Plan, last reviewed 5/8/25 revealed, " ... at risk for alteration in thought process r/t [related to] use of psychoactive medication for management of depression, PTSD, and mood d/o [disorder]..." and "...at risk for anxiety/behaviors, decreased psychosocial well-being and increased isolation related to PTSD, depression, and mood d/o..." Further record review revealed a pre-admission "Notice of PASRR Level I Screen Outcome," dated 11/15/22, that indicated Level II screening was not required and states, "No mental health diagnosis is known or suspected ...There are no known mental health behaviors ...no known recent or current mental health symptoms ..." and lacked evidence that a new screen was submitted for the above diagnoses and symptoms. On 7/8/25 at 11:43 a.m., during an interview, the Director of Social Services stated tracking updated diagnoses and behavioral changes is a team approach with the Director of Nursing (DON) and sometimes the MDS Coordinator, and that it is discussed in the facility's daily morning meeting. After reviewing Resident #14's diagnoses, the Director of Social services stated Resident #14 needs an updated PASRR screening and that she does not even recall the resident being discussed for having mental health diagnoses. On 7/8/25 at approximately 12:00 p.m., the above finding was discussed with the DON. At this time, the DON stated Resident #14 does need a new PASRR, and she will initiate the screening.			F0644

F0657 SS = D	Continued from page 11 and quarterly review assessments. This REQUIREMENT is NOT MET as evidenced by: Based on observation, record review and interview, the facility failed to ensure a care plan was accurately revised for 1 of 2 residents reviewed for intravenous (IV) antibiotic use and transmission-based precautions (Resident #24). On 7/7/25 at 10:16 a.m., a surveyor observed Resident #24 receiving an IV infusion of the antibiotic Vancomycin. Resident #24 stated he/she had an infection of the right leg and was receiving 2 IV antibiotics. A review of Resident #24's clinical record noted a history of MRSA (methicillin resistant Staphylococcus aureus), a multidrug resistant organism, and recurrent lower extremity cellulitis. The record noted Resident #24 had been treated with IV antibiotics in May, 2025. The record noted on 6/25/25, Resident #24 had a PICC (peripherally inserted central catheter) line placed at the local hospital and was started on IV vancomycin and cefepime. A review of Resident #24's current care plan, last revised on 6/19/25, included the problem area: risk for infection. Resident #24's need for IV antibiotics was not included in the care plan. One intervention stated "use standard precautions unless otherwise indicated." On 7/9/25 at 9:30 a.m., a surveyor observed an Enhanced Barrier Precautions sign had been placed on Resident #24's door. This replaced a previous sign which stated "see nurse for instructions." On 7/9/25 at 10:00 a.m., in an interview with a surveyor, the Nurse Manager stated Resident #24 frequently receives IV antibiotics for recurrent wound infections. On 7/9/25 at 12:30 p.m., in an interview with the Director of Nursing, the surveyor discussed that the current care plan had not been revised to address Resident #24's need for IV antibiotics. In addition, the care plan instructed staff to use standard precautions, while a sign on the resident's door advised of the need for Enhanced Barrier Precautions. The Director of Nursing confirmed that Contact	F0657

F0689 SS = D	Free of Accident Hazards/Supervision/Devices CFR(s): 483.25(d)(1)(2) §483.25(d) Accidents. The facility must ensure that - §483.25(d)(1) The resident environment remains as free of accident hazards as is possible; and §483.25(d)(2) Each resident receives adequate supervision and assistance devices to prevent accidents. This REQUIREMENT is NOT MET as evidenced by: Based on observations, record review, and interviews, the facility failed to ensure that the resident's environment was free of accident hazards by failing to maintain a clutter-free pathway in the resident's room for 1 of 1 sampled resident reviewed for accidents (Resident #14). On 7/7/25 at 9:02 a.m. and 7/8/25 at 8:33 a.m., a surveyor observed a clear plastic bag containing two siderails, located on the floor next to Resident #14's bed, two wheelchair footrests and multiple pairs of shoes on the floor next to Resident #14's recliner, and a pair of shoes on the floor in front of the recliner. A review of Resident #14's most recent Fall Risk Screen, dated 4/30/25, indicated he/she is at high risk for falls. Review of Resident #14's care plan, updated 5/8/25, includes, "...at risk for falls...keep environment free from clutter and pathways clear of obstacles," and "...frequently incontinent...implement safety measures (keep path to bathroom clear and well lit...)," and "...ability to see in adequate light is impaired...Keep areas free of obstructions to reduce the risk of falls or injury..." On 7/8/25 at 9:48 a.m., a surveyor and the Director of Nursing (DON) observed the siderails, footrests, and shoes on Resident #14's floor. The DON stated Resident			F0689

F0689 SS = D	Continued from page 13 #14 gets out of bed and transfers himself/herself to the chair at times and the environment was cluttered.			F0689			
F0695 SS = E	Respiratory/Tracheostomy Care and Suctioning CFR(s): 483.25(i) § 483.25(i) Respiratory care, including tracheostomy care and tracheal suctioning. The facility must ensure that a resident who needs respiratory care, including tracheostomy care and tracheal suctioning, is provided such care, consistent with professional standards of practice, the comprehensive person-centered care plan, the residents' goals and preferences, and 483.65 of this subpart. This REQUIREMENT is NOT MET as evidenced by: Based on observations, record reviews, interviews and the facility policy, the facility failed to maintain a sanitary environment to help prevent the development and transmission of disease and infection related to respiratory care for 4 of 5 residents reviewed for respiratory care (Resident #45, #151, #29 and #35). In addition, the facility failed to ensure physician orders were followed for 1 of 5 residents receiving oxygen therapy (Resident #10) Oxygen use & Storage Policy last revised on 6/25 states under respiratory care "A Sanitary environment must be maintained to prevent the transmission of disease and infection." A. Nasal Cannula's will be discarded and changed every 2 weeks. The respiratory set up bag will be labeled with resident's name and the date the equipment was changed or the date changed can be directly labeled on the cannula with a piece of tape. When the nasal cannula is not in use, on both the concentrator and portable tank, the cannula will be stored in a plastic bag to avoid the risk of it becoming contaminated. B. Nebulizer parts should be rinsed after each use, allowed to air dry while being covered with a paper towel and placed in respiratory set up bag once dried. Respiratory set-ups for nebulizers will be changed every 2 weeks. Nebulizer filters will be rinsed every 2 weeks and changed on a monthly basis. D. Staff changing the tubing should document on the Treatment Administration Record (TAR) when the tubing has been changed following this policy.			F0695

F0695 SS = E	Continued from page 14 E. When the tubing is changed, the filter in the concentrator must also be removed and rinsed off to ensure the filter remains free from dust. Continuous positive airway pressure (CPAP)/ Bilevel positive airway pressure (BIPAP) Management policy last revised on 6/25 states under "Daily Cleaning Recommendations" Mask and/or nasal pillows wash in warm soapy water, allow to air dry, out of direct sunlight or wipe down with a recommended CPAP wipe. Once completed, place clean equipment into plastic bag. Water chamber empty any remaining water after treatment. 1. On 7/7/25 at 10:01 a.m., and on 7/8/25 at 8:11 a.m., observations of Resident #151's nasal cannula with foam protectors taped to the tubing, unlabeled and stored on the bedside dresser. Review of the medical record lacked evidence of nursing changing the nasal cannula every 2 weeks. 2. On 7/7/25 at 9:20 a.m., and on 7/8/25 at 8:11 a.m., observations of Resident #45's nebulizer pipe and tubing, unlabeled and stored on top of the bedside dresser and a Continuous positive airway pressure (CPAP) mask draped over the CPAP machine. There was no respiratory set up bag for storage observed. Review of Resident #45's Treatment Administration Record lacked evidence of the changing and/or cleaning of the Nebulizer tubing/pipe and CPAP mask. On 7/8/25 at 10:12 a.m., during an interview, the above was observed and confirmed with the Director of Nursing (DON). On 7/8/25 at 2:58 p.m., an additional observation of Resident #45's CPAP mask draped over the machine and hanging between the wall and the bedside dresser. At this time, it was again confirmed with the DON 3. On 7/7/25 at 9:27 a.m., a surveyor observed Resident #10 wearing oxygen via nasal cannula with the oxygen concentrator set at 3 liters. F0695 SS = E	Continued from page 15 On 7/8/25 at 1:07 p.m., a surveyor observed Resident #10 asleep and wearing oxygen via nasal cannula with the oxygen concentrator set at 2.5 liters. A review of Resident #10's medical record revealed a physician's order, dated 8/22/24 for "Oxygen (O2) at 2 liters per minute via nasal cannula without humidification. May use as needed for complaints of cluster headaches (effective historically per resident)." A review of Resident #10's Treatment Administration Records (TAR) for June and July, 2025, noted no documentation for the use of oxygen, though the oxygen tubing was changed every 2 weeks per facility policy. On 7/8/25 1:33 p.m., in an interview with the Vice President of Quality Improvement & Nursing Services, the surveyor discussed the observations of Resident #10 and the lack of documentation for Resident #10's oxygen use. The Vice President of Quality Improvement and Nursing Services confirmed the findings did not reflect the physician's order and stated she would clarify the correct order at this time. 4. On 7/7/25 at 9:03 a.m. and on 7/8/25 at 10:15 a.m., observation of Resident #29's unbagged nebulizer mask and tubing on the bedside table dated 1/21. Review of Resident #29's clinical record indicated an active physician order for Albuterol Sulfate Inhalation Nebulization Solution 2.5 mg/3 mL (0.083 %) with directions to use every 6 hours as needed. Review of the medication administration record/treatment administration record indicated that his/her last time using the nebulizer was on 5/26/25. On 7/8/25 at 10:15 a.m., the above information was confirmed with the DON. 5. On 7/7/25 at 8:57 a.m. and on 7/8/25 at 8:26 a.m., Resident #35's unbagged nebulizer mask was observed hanging on the nebulizer machine on his/her nightstand.			F0695

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)			ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)		(X5) COMPLETION DATE
F0880 SS = E	Continued from page 23 Based on observations, record review and interview, the facility failed to maintain an Infection Control Program designed to help prevent the development and transmission of disease and infection by failing to conduct ongoing surveillance, tracking and educations to prevent the spread of Infections, failed to apply appropriate interventions including Transmission Based Precautions (TBP) and Enhanced Barrier Precautions (EBP), and failed to develop and implement elements of a Legionella Water Management Program. This has the potential to affect all 47 residents. Infection Control: Multidrug-Resistant Organism (MDRO's) policy, last revised 4/18/24 states Enhanced Barrier Precautions (EBP): gowns and gloves are worn during high-contact resident care activity. Examples of high-contact activity are: Performing ADLS (activity of daily living) - bathing, dressing, transfers and toileting. Providing device care and/or wound care. Device are would include central lines, catheters ... Under procedure states, Residents being treated for an active MDRO infection will be placed on Contact precautions. Residents who have completed treatment for MDRO's will then be placed on Enhanced Barrier Precautions (EBP). Gloves and Gowns will be used when performing high-contact care activities. 1. On 7/7/25 at 9:14 a.m., observation of Resident #45's room door with a small "Stop see nurse for instructions" sign posted on the door frame, no directions on what Personal Protective Equipment (PPE) to utilize prior to entering the room. Directly inside the room was a cart containing Personal Protective Equipment (PPE). Resident #45 was receiving an Intravenous (IV) antibiotics via a peripherally inserted central catheter (PICC) line. At this time, the resident stated he/she has an infection in the wound on the coccyx which requires daily dressing changes and is followed by infectious disease. On 7/8/25 at 8:11 a.m., an additional observation of resident #45's room to have only a stop see nurse for instructions sign posted on the door frame. There were no additional directions on what type of precautions or what PPE to wear prior to going into the room. Review of the medical record confirmed he/she has a diagnosis of an unstageable coccygeal pressure ulcer with osteomyelitis containing Methicillin-resistant Staphylococcus aureus (MRSA) and Extended-Spectrum			F0880

F0880 SS = E	Continued from page 24 Beta-Lactamases (ESBL) Klebsiella, both a Multidrug - Resistant Organism (MDRO's) with an active order for a dressing to the coccyx wound daily. On 7/8/25 at 2:58 p.m., both the Director of Nursing (DON) and the Surveyor observed Resident #45 room to have the small "Stop see nurse for instructions" sign on the door frame. The surveyor asked the DON what precautions were needed and why when caring for resident #45. The DON stated, he/she is being treated for an active infection involving MDRO's and contact precautions should be utilized when providing wound care and enhanced barrier precautions when providing IV care. At this time, the surveyor asked why the precaution is not posted and which precaution is to be used, being that they are 2 very different types i.e., Contact requires appropriate PPE when entering the room while EBP requires PPE using gowns and gloves during specific high-contact resident care activities. The DON did not have an answer. On 7/9/25 at 11:14 a.m., observation of Resident #45's room to now have an EBP sign posted on the door instructing staff to use gloves and gowns when performing high-contact resident care activities. At this time, Registered Nurse (RN #1) stated he/she is on EBP for both the wound and the IV line, has an active infection and is on 2 different antibiotics to "treat 3 different bugs" since admission. The surveyor asked what organism or "bug" he/she is being treated for. RN #1 stated, "I'm not sure, one is MRSA, I think". The surveyor asked what type of precautions he/she should be on while being treated for an MDRO. RN#1 stated, EBP and "originally I had put [resident #45] on contact precautions when [he/she] came to us" and she is not sure why or when it was changed. At this time, the surveyor discussed the facilities policy of when a resident has an active MDRO infection, they are to be Contact precautions. RN #1 did not have response. 2. On 7/7/25 at 10:23 a.m., and on 7/8/25 at 10:20 a.m., observation of Resident #47 to have bilateral feet wrapped in kerlix and wearing orthopedic shoes. At this time in an interview, he/she confirmed both feet had surgical wounds which required dressing changes. Review of the medical record states Resident #47 was admitted 6/11/25 with diagnosis of chronic osteomyelitis resulting in amputation of toes on both feet and surgical wounds requiring treatments every	F0880

F0880 SS = E	Continued from page 25 other day. In addition, he/she has a stage 2 pressure ulcer on the right hip requiring treatment three times daily. The room lacked notification/posting of Enhanced Barrier Precautions and available personal protective equipment. 3. On 7/7/25 at 9:14 a.m., a surveyor observed a small red and white "Stop, See Nurse for Instructions" sign on Resident #16's door frame. There was no Personal Protective Equipment (PPE) outside or inside the room, and there was no additional signage on the door. At this time, Certified Nurse Medication Aide (CNA-M) #3 was exiting the room, and a surveyor asked about the sign. CNA-M #3 stated the sign indicates precautions, but she is not sure what type of precautions this resident is on because today is her first day back as agency staff. On 7/7/25 at 10:53 a.m., during an interview, Registered Nurse (RN) #2 stated today is her first day at the facility and she is agency staff and is not sure if Resident #16 is on precautions. RN #2 then checked Resident #16's clinical record and stated Resident #16 has MRSA (methicillin-resistant staphylococcus aureus), and that she is not sure where PPE is located but thinks she was told in the closet next to the nurses' station. On 7/7/25 at 2:14 p.m., during an interview, CNA #1 stated today is her first day as a permanent staff member and that she is not sure if any residents on the Clearwater unit are on precautions and that she was not told where to find PPE but that she is training with CNA #2. On 7/7/25 at 2:52 p.m., during an interview, CNA #2 stated no residents on the Clearwater unit are on EBP or TBP and that there are gowns in the linen closet and trash cans in the supply closet, and trash cans get put in front of the door for residents on precautions. On 7/7/25 at 2:58 p.m., during a follow-up interview, CNA-M #3 stated she worked here as an agency staff member from December 2024-June 2025, and typically, residents have the red and white "Stop" signs hanging outside the door but no signage is posted indicating what type of precautions the resident is on, and if a resident on precautions, a trash can and a 3-drawer bin with gowns and gloves is placed outside the door. CNA-M			F0880

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)			(X5) COMPLETION DATE	
F0880 SS = E	Continued from page 26 #3 then stated residents with Foley catheters or wounds are not placed on EBP and that there are no residents on the Clearwater unit on EBP or TBP but she knows Resident #14 has a foot wound and Resident #7 has a Foley catheter. 4. Review of Resident #14's clinical record indicated Resident #14 has a right lateral midfoot diabetic ulcer. Further record review revealed an active physician order for "Right lateral foot Cleanse wound for at least 1 minute Apply Medihoney to wound bed ...Apply Mepilex ...Dressing change daily ..." On 7/8/25 at 8:30 a.m., a surveyor entered Resident #7 and Resident #14's shared room, and there was no "Stop" sign or other signage on the door and no PPE outside or inside the room. At this time, Resident #7 stated he/she has a Foley catheter, and when the Certified Nursing Assistants (CNAs) empty the drainage bag or the nurses change the catheter, they wear gloves but he/she has not noticed anyone wearing a gown or other PPE. On 7/8/25 at 1:08 p.m.-1:45 p.m., during an interview, the above concerns were discussed with the DON and Infection Preventionist (IP), and the DON stated "Stop" signs are placed outside a resident's door but no signage indicating what type of precautions or what type of PPE is required is placed on the resident's door. The surveyor asked how new staff are educated on infection control upon hire, as CNA #1, CAN-M #3, and RN #2 were day 1 staff on the Clearwater unit yesterday and could not tell a surveyor the location of PPE or if residents were on precautions and what type. The DON then stated Infection Control education is provided as part of a comprehensive orientation, but that does not take place on day 1 and is provided within the first week of employment. At this time, a surveyor requested additional evidence of the facility's ongoing surveillance and tracking for EBP and TBP and evidence of staff education on infection control measures. Review of the provided "Educational Program Sign-In Sheet ...Topic: Infection Control" Enhanced Barrier Precautions," dated 6/24/25 indicates 23 staff members attended, and of those, only 9 were nursing staff (8 CNAs, IP). Review of the provided f "Enhanced Barrier Precautions" surveillance census was dated 7/9/25 (after survey	F0880

F0880 SS = E	Continued from page 27 start date) and indicates 10 residents in the facility are on EBP. The census did not indicate Resident #14 and Resident #47 were on precautions, despite a surveyor previously discussing this with the DON and IP. On 7/9/25, at 12:03 p.m., during a follow-up interview with the DON, a surveyor discussed concern with recent EBP education only including 9 nursing staff and no evidence of EBP/TBP surveillance prior to the survey. The DON stated she posts a monthly calendar of mandatory annual training offerings, but if all required staff does not attend, she posts another calendar the following month offering the training again. At this time the DON confirmed the facility did not have ongoing EBP and TBP surveillance, tracking, and education in place. 5. Review of policy, "Legionnaires Prevention Program Policy," dated 7/19, states, " ...Establish a water management team ...The following employees will be on the Water Management Team ... The Administrator ...The Infection Control Specialist ...The Maintenance Director ...Corporate Plant Manager ...Describe Your Building Water Systems Using a Flow Diagram ...Identify Areas Where Legionella Could Grow & Spread on the flow diagram ...Decide where Control Measures should be applied & how to monitor them ...You will need to monitor to ensure your control measures are performing as designedStaff, residents and their representatives will be informed of the in place to keep the building water systems safe. A copy of the plan will be shared upon request ..." Further review of the policy lacked evidence of the description of the water system or a flow diagram and did not specify control measures or how the control measures are being monitored. On 7/8/25 at 1:08 p.m., during an interview with the Director of Nursing (DON) and Infection Preventionist (IP), a surveyor requested evidence of the facility's water management program. The DON stated she had asked the Administrator about water testing but could not provide a written plan. On 7/9/25 at 2:01 p.m., during a follow-up interview and after multiple surveyor requests, the DON stated she could not provide evidence of the facility's Legionella Water Management Program. This REQUIREMENT is NOT MET as evidenced by: Based on record review and interview, the facility failed to ensure a resident who had elected to receive a Pneumococcal immunization received the immunization, for 1 of 5 resident records reviewed for immunizations (Resident #25) Review of Resident #25's clinical record revealed a signed Immunization Consent Form, dated 7/24/24, indicating Resident #25's legal representative consented to the Pneumococcal immunization. Further review of the clinical record lacked evidence that Resident #25 received or refused the Pneumococcal immunization. On 7/9/25 at 12:52 p.m., during an interview with two surveyors, the Infection Preventionist stated the Director of Nursing handles immunization tracking. On 7/9/25 at 12:57 p.m., two surveyors reviewed the above findings with the Director of Nursing.			F0883			

**Maplecrest Rehab and Living Center
Plan of Corrections**

Life Safety/Emergency Preparedness Survey

07/09/2025

Please note the filing of this plan of correction does not constitute an admission for the allegations set forth in the Statement of Deficiencies. The facility is filing this Plan of Correction in accordance with applicable law.

F 0584 Safe/Clean/Comfortable/Homelike Environment

CFR(s): 483.10(i)(1)-(7)

A staff member cleared all trash/debris from Room 103B and reviewed all other rooms to confirm they are free of all trash/debris.

Repairs will be assigned to the Maintenance Director and/or Designee with an expected date of completion

All residents had the potential to be affected by the deficient practice.

The Maintenance Director will be educated on maintaining a Safe, Clean, Comfortable, Homelike Environment

Administrator and Business Office Manager will be creating a spreadsheet of needed repairs.

Administrator and/or designee will conduct an audit once a month for the next quarter, and random audit to ensure compliance.

Completion Date: 08/15/2025

F 0610 Investigate/Prevent/Correct Alleged Violation

CFR(s): 483.12(c)(2)-(4)

Administrator and/or designee will review and educate staff on Abuse Policy and “what is a reportable incident”.

All residents had the potential to be affected by the deficient practice.

Administrator and/or designee will audit reportable incidents in weekly meetings, and complete random audits to ensure compliance.

Completion Date: 08/15/2025

F 0641 Accuracy of Assessments
CFR(s): 483.20(g)(h)(i)(j)

IDR Requested, please see attachment

Charts and findings were reviewed by the Corporate Medicare Case Mix Specialist on receipt of the statement of deficiencies

The MDS Coordinator will receive education by August 18, 2025

Administrator and/or designee will audit MDS's weekly x 4

F 0644 Coordination of PASARR and Assessments
CFR(s): 483.20(e)(1)(2)

The Social Worker did a PASRR referral and a PASRR was completed.

No other residents were affected by this deficient practice.

Staff will be educated on new diagnoses and order changes will be reviewed at UR Meetings and IDT Meetings.

Education about diagnoses that trigger a PASRR evaluation will be reviewed with the management team by August 18, 2025

Administrator and/or designee will conduct an audit once a month for the next quarter, and random audit to ensure compliance.

Completion Date: 08/08/2025

F0656: Comprehensive Care Plans
CFR(s): 483.21(b)(1)(3)

All residents had the potential to be affected.

All care plans for residents with orders for oxygen, CPAP, BiPap, or nebulized medications were reviewed on 8/1/25. Corrections and suggestions were submitted to the IDT on 8/5/25 and implemented the same day. A physical audit of residents with floor mats was completed on August 4, 2025. Charts were corrected to include appropriate orders and care plans.

Education regarding care plan requirements will be provided to nursing staff by August 18, 2025. Care plan audits will be completed weekly for 12 weeks by the DNS, or designee to monitor compliance. Results will be brought to QAPI.

Completion Date: 08/18/2025

F0657 Care Plan Timing/Revision
CFR(s): 483.21(b)(2)(i)-(iii)

Two residents had the potential to be affected.

An audit of residents requiring EBP was completed on August 4, 2025. All care plans will be updated to include EBP and MDRO's by August 8, 2025.

Nursing staff will receive education regarding care plan updates and revisions by August 18, 2025.

Audits of EBP and PPE will be conducted weekly for 12 weeks. Results will be brought to QAPI as needed.

Completion Date: 08/18/2025

F0689 Free of Accidents/Hazards
CFR(s): 483.25(d)(1)(2)

All residents had the potential to be affected.

A physical audit of resident spaces was conducted on August 5, 2025. Identified issues were resolved during the audit.

Nursing staff will be educated on the importance of environmental management for fall risk patients by August 18, 2025.

A physical audit of resident rooms will be conducted to determine if there are barriers to safety weekly for 12 weeks. Results will be brought to QAPI as needed.

Completion Date: 08/18/2025

F0695 Resp/Trach
CFR(s): 483.25(i)

All residents receiving respiratory medications/interventions had the potential to be affected.

An audit of respiratory equipment in resident rooms was conducted on August 4, 2025. Corrections will be made to equipment, orders and care plan by August 8, 2025.

Education regarding CPAP, BiPap, Oxygen and Nebulizer Storage will be provided to nursing staff by August 18, 2025.

Audits of respiratory equipment will be completed weekly for 12 weeks by the DNS, or designee to monitor compliance. Results will be brought to QAPI as needed.

Completion Date: 08/18/2025

F0755 Pharmacy Services
CFR(s): 483.45(a)(b)(1)-(3)

All residents receiving narcotics had the potential to be affected.

Nursing staff education will be provided, education regarding correct counting procedures by August 18, 2025.

The DNS, or designee, will audit the narcotic count log weekly for 12 weeks. Results will be brought to QAPI as needed.

Completion Date: 08/18/2025

F0761 Label/Store Drugs and Biologicals
CFR(s): 483.45(g)(h)(1)(2)

All residents had the potential to be affected.

The controlled substance storage compartment of the refrigerator was permanently affixed in the medication refrigerator on August 13, 2025.

The medication cart was inspected to ensure that the narcotic box was capable of locking on August 4, 2025.

The locking mechanism was deemed to be in appropriate working order.

Nursing staff will be education on medication cart management, drug storage, locking mechanism, and accountability by August 18, 2025. Results will be brought to QAPI as needed.

Completion Date: 08/18/2025

F 0812 Food Procurement, Store/Prepare/Service-Sanitary
CFR(s): 483.60(i)(1)(2)

The Food Service Director recorded temps (hot/cold) to bring temp logs up to date.

All residents had the potential to be affected by the deficient practice.

The Food Service Director educated staff on 07/21/2025 and 07/22/2025 of food storage policy, and all temps (hot/cold), steamtable, dish machine, and chemical sanitizer readings.

Administrator, Food Service Director and/or designee will conduct weekly audits for the next quarter to confirm all temps are in compliance.

Completion Date: 08/15/2025

F0880 Infection Prevention & Control
CFR(s): 483.80(a)(1)(2)(4)(e)(f)

All residents had the potential to be affected.

The resident identified immediately had signage and PPE placed and staff received education regarding her care.

A water management program, including Legionnaire's testing, will be developed and implemented by August 18, 2025.

Nursing staff will receive education about EBP and correct PPE by August 18, 2025.

All signage and PPE will be corrected by August 8, 2025.

Completion Date: 08/15/2025

F0883 Influenza and Pneumococcal immunizations
CFR(s):

All residents had the potential to be affected.

All consents will be audited for responses by August 8, 2025.

All vaccinations that had previously been consented for vaccination will be ordered and will be administered upon delivery.

An infection prevention and control resource binder, including appropriate vaccination schedules, was created and placed in the facility. All consents will be reviewed by the Infection Prevention RN, or designee, prior to filing. Results will be brought to QAPI as needed.

Completion Date: 08/18/2025

August 7, 2025

Celine Donahue, RN
Long-Term Care Supervisor
Department of Health and Human Services
Division of Licensing and Certification
11 State House Station, 41 Anthony Avenue
Augusta, Maine 04333-0011

Sent electronically to: Celine.Donahue@Maine.gov and Cherrie.Manzo@Maine.gov

Dear Ms. Donahue:

Pursuant to receipt of your letter and the statement of deficiencies resulting from a complaint investigation conducted at Maplecrest Rehabilitation & Living Center on July 7, 2025, please find the facility plan of correction, which serves as our allegation of compliance.

In accordance with 483.20(g)(h)(i)(j), Maplecrest Rehabilitation & Living Center requests an Informal Dispute Resolution, to dispute the deficiency F0641 – Reporting of Alleged Violations: 483.20(g)(h)(i)(j). The facility has additional information/facts which we believe had not been considered as a part of this determination.

Should you have any questions regarding the enclosed, please contact me directly at (207) 696-8225.

Sincerely,

Lori Knowlton, LSW, MLA
Administrator

Maplecrest MDS-Related Survey Findings

Survey Completion Date 7/9/2025

- Resident #10 (ARD 6/25/2025): Survey findings state "...physician's order dated 8/22/2024 for oxygen at 2l/min nasal cannula...use ***as needed*** for complaints of cluster headaches". Survey findings remarked that Section O coding for oxygen administration was incomplete (not marked as being provided)
 - Clinical Notes for 14-day lookback period of 6/12-6/25: No documentation of oxygen usage by this resident
 - Treatment Administration Record for 14-day lookback period of 6/12-6/25 reveals administration of prn oxygen ***did not occur***. TAR attached to this report
 - Instructions for coding this section of the MDS specify "Check all of the following treatments, procedures, and programs that were performed...within the last 14 days". As oxygen was not administered to this resident during the 14-day lookback period of 6/12-6/25/2025, it should not have been coded in the MDS
- Resident #12 (ARD 3/25/2025): Survey findings state "Clinical record revealed a history of UTIs with ESBL..., an MDRO". Survey findings remarked that MDS did not indicate the presence of an MDRO in Section I1700.
 - The MDS specified in the survey was 3/25/2025; however, this is the date the MDS was created. The actual ARD for this MDS is 4/14/2025
 - During the lookback period, this resident did not have an active diagnosis of UTI with ESBL
 - From the RAI Manual (I-7, 8): ***Once a diagnosis is identified, it must be determined if the diagnosis is active. Active diagnoses are diagnoses that have a direct relationship to the resident's current functional, cognitive, or mood or behavior status, medical treatments, nursing monitoring, or risk of death during the 7-day lookback period. Do not include conditions that have been resolved, or do not affect the resident's current status.***
 - A history of an MDRO is not considered an active diagnosis, and should not be coded in the Section I of the MDS

Maplecrest MDS-Related Survey Findings

Survey Completion Date 7/9/2025

- Resident #24 (ARD 6/17/2025): Survey findings state "...diagnosis of recurrent lower extremity cellulitis and a history of MRSA, an MDRO". Survey findings remarked that MDS was not coded to indicate the presence of an MDRO in Section I1700
 - From the RAI Manual (I-7, 8): ***Once a diagnosis is identified, it must be determined if the diagnosis is active. Active diagnoses are diagnoses that have a direct relationship to the resident's current functional, cognitive, or mood or behavior status, medical treatments, nursing monitoring, or risk of death during the 7-day lookback period. Do not include conditions that have been resolved, or do not affect the resident's current status.***
 - A history of an MDRO is not considered an active diagnosis, and should not be coded in Section I of the MDS
- Having personally responded to over 100 Medicare A audits for NCA buildings, I can assure you that CMS would not support the coding of MDRO in Section I of the MDS if it is not currently an active diagnosis. This is a payment item in the NTA component of PDPM, and would need to be supported by documentation that it is currently active. This was collaborated in a conversation with Sue Pinette, Maine State RAI Coordinator.
