F 578 SS=E	From 10/21/24 through 10/23/24, on-site visits were conducted at Maine Veterans Home -Augusta for the purpose of completing the annual Long Term Care Survey Process for Federal Recertification. It was determined that Maine Veterans Home -Augusta was not in compliance with 42 CFR Part 483, Subpart B, Requirements for Long Term Care Facilities. Request/Refuse/Dscntnue Trmnt;Formlte Adv Dir CFR(s): 483.10(c)(6)(8)(g)(12)(i)-(v) §483.10(c)(6) The right to request, refuse, and/or discontinue treatment, to participate in or refuse to participate in experimental research, and to formulate an advance directive. §483.10(c)(8) Nothing in this paragraph should be construed as the right of the resident to receive the provision of medical treatment or medical services deemed medically unnecessary or inappropriate. §483.10(g)(12) The facility must comply with the requirements specified in 42 CFR part 489, subpart I (Advance Directives). (i) These requirements include provisions to inform and provide written information to all adult residents concerning the right to accept or refuse medical or surgical treatment and, at the resident's option, formulate an advance directive. (ii) This includes a written description of the facility's policies to implement advance directives and applicable State law. (iii) Facilities are permitted to contract with other entities to furnish this information but are still legally responsible for ensuring that the requirements of this section are met.			F 578

TITLE

(X6) DATE

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 880	Continued From page 13 on the counter. CNA-M was then observed leaving Room 9, with the empty syringe walking by hand sanitizer located on the wall next to exit door, left the room and proceeded to walk to the end of the hall and into the medication room where another hand sanitizer was located on top of the shelf by the door. CNA-M then picked up a clear plastic cup with her left hand, and while still holding empty syringe in her right hand walked back down the hall and around the corner to the kitchenette. CNA-M then placed the plastic cup on the counter with her left hand, opened the refrigerator door with her right hand containing the empty syringe and removed a bottle of cranberry juice with her left hand. She then moved the empty syringe from her right hand to her left hand and used her right hand to pick up the juice and poured it into the plastic cup and put the juice back in the refrigerator. CNA-M then picked up the plastic cup with her right hand, empty syringe in her left and proceeded to walk back into Room 9 and assisted resident to drink the juice. CNA-M then took the empty plastic cup in her right hand and the empty syringe in her left hand and again walked past the hand sanitizer on the wall by the exit door and proceeded to walk to the end of the hall and back to the medication room, where she disposed of the syringe, threw the plastic cup in the trash and began to wash her hands. CNM-M then returned to Room 9 and retrieved her laptop from the counter by the door. At 8:03 a.m., 2 surveyors observed CNA-M in common area where Resident #41, (who resided in room 8) was sitting and asked him/her if he/she was ready for morning medications. CNA-M was then observed placing the lap top she just obtained from Room 9 and placed it on the counter in Room 8. At this time, a surveyor	F 880

F 880	Continued From page 14 attempted to obtain hand sanitizer from the dispenser located on the wall by the door entrance, but it was empty. A surveyor then said out loud that the sanitizer was empty. CNA-M began to open the medication cupboard and started removing pills from prepared pill packs and placed them in a medicine cup without using hand hygiene prior. CNA-M then dropped a pill on the counter, reached over and removed a glove from a glove box located on the counter, donned (put on), picked up the pill and placed it in the medication cup. She then doffed (removed) the glove and threw it in the trash can located next to the counter, then reached over to the hand sanitizer located on the wall next to the door and rubbed her hands together. The surveyor again indicated the hand sanitizer was empty. CNA-M said "That's ok". At this time CNA-M's phone rang, she put her right hand in her pocket and retrieved the phone answered it and returned it to her pocket. She then picked up the medication cup with her right hand, and the laptop with her left and left the room, walked up the hall to the medication room and retrieved a plastic cup, tucked the laptop under her left arm and came back down the hall to the kitchenette and placed the laptop and medication cup on the counter next to the refrigerator. CNA-M then opened the refrigerator with her right hand, removed cranberry juice, and poured it in the plastic cup. She then replaced the juice in refrigerator, picked up the juice in her left hand covering the top lip of the cup, picked up the cup of juice with her right and walked around the corner toward Resident #41. At this time a surveyor asked what her intent was at this point, CNA-M indicated she was going to give resident his/her medications. A surveyor expressed their concerns regarding hand hygiene, as she did not use hand hygiene prior to	F 880

F 880	Continued From page 15 preparing medication, did not practice hand hygiene prior to doffing gloves, and pretended to use hand sanitizer after doffing gloves, answered the phone, and her hands were touching the lip of the medication cup. CNA-M stated, "You're absolutely right" She then walked around the corner, down the hall and to the medication area, put the pills and cup of juice on the counter, washed her hands, picked up the pills and juice back up and returned to give the resident his/her medications. She then picked up the laptop, walked out of room and went directly into Room 18. At 8:23 a.m., CNA-M was observed entering Room 18 and placed the laptop on the counter just inside the door. CNA-M opened medication cabinet and began to remove medications from bottles and pill packets. CNA-M then removed 2 gloves from the box on the counter and donned them without using hand sanitizer and started to pull apart capsules to remove the medications and pored them inside a medication cup. At this time a surveyor asked what the policy was for doffing and donning gloves. CNA-M stated she was not sure and would have to ask her supervisor and continued to pull apart the remaining capsules. She then doffed the gloves and used hand sanitizer. At this time 2 surveyors confirmed with CNA-M that she did not use and sanitizer prior to preparing the medications or donning gloves. At this time 2 surveyors confirmed with CNA-M she did not use hand sanitizer prior to donning gloves. During an interview with 2 surveyors on 10/22/24 at 8:33 a.m., Cares Demetia Specialist (CNS) confirmed the expectation is that staff use hand sanitizer before and after the use of gloves,	F 880

F 880	Continued From page 16 before and after entering the rooms and before and after preparing and administering medications. 2. In reviewing the facility policy on infections regarding transmission based precautions, the following was noted: methods of implementing and control, page 17 of the facilities infection control policy-the CDC has provided guidance for enhanced barrier precautions, which falls between standard and contact precautions, and requires gown and glove use for certain residents during specific high contact resident care activities that have been found to increase risk for multi drug resistant organism(MDRO) transmission. Enhanced barrier precautions-definition: Barrier Precautions expands the use of personal protective equipment (PPE) beyond situations in which exposure to blood and body fluids is anticipated, refers to the use of gown and gloves during high contact resident care activities that provide opportunities for transfer of MDRO's to staff hands and clothing. Examples of high contact resident care activities requiring gown and glove use for enhanced barrier precautions include: dressing, bathing/showering, transferring, providing hygiene, changing linens, changing briefs or assisting with toileting, device care or use: central line/urinary catheter/feeding tube/tracheostomy/ ventilator, wound care: any skin opening requiring a dressing. Implementation: when implementing contact precautions or enhanced barrier precautions, it is critical to ensure that staff have awareness of the facility's expectations about hand hygiene and gown/glove use, initial and refresher training, and access to appropriate supplies. To accomplish	F 880
