The RT cleaned the overbed table and set up her barrier, discarded her gloves, and applied new gloves without washing her hands. She then proceeded to perform tracheostomy care. The RT removed sterile gloves from the suction catheter kit and applied the sterile gloves over her soiled gloves. The RT suctioned the resident and then removed her sterile gloves leaving her soiled gloves intact, failing to wash her hands. The RT opened the tracheostomy care tray with the soiled gloves, removed the sterile gloves, placed them over the non-sterile gloves, and continued tracheostomy care. The RT removed her gloves, packaged up the unclean trach supplies, and placed them in a red biohazard bag, she removed a soiled washcloth that was saturated with fluids that had been placed under Resident #53's trach for any excessive secretions and stated "I'm not supposed to put this on the floor, but I don't have anywhere to place it. There should be a container in here. RT #1 then placed the soiled washcloth on the floor and exited the room. She tucked the red biohazard bag under her arm and briskly applied antiseptic hand sanitizer from a bottle on the top of her treatment cart.</p> <p>In an interview on 7/17/24 at 10:35 AM, Respiratory Therapist #1 revealed that she wasn't sure if Resident #53 was under enhanced barrier precautions or not and then stated, "No, I don't think he is he doesn't have an infection." The RT glanced at the resident's door and then stated, "Oh yes, he has one of those signs on the door, I was supposed to wear a gown into his room." She confirmed she had not worn the proper personal protective equipment into the room to render care to the resident. She revealed that she had not been trained in enhanced barrier</p> | F 880                                                                      |                                                                                                                          |                            |                                                        |

RT #1 revealed that during her tracheostomy care, she was taught in school to keep her gloves on and put the sterile gloves over top of them and wasn't aware that she had to remove the soiled gloves and wash her hands during the dirty and clean process of rendering tracheostomy care. The RT revealed that she understood where it could be an infection control issue and confirmed that she had not used proper hand hygiene while performing tracheostomy care on Resident #53, and by not doing so, it's possible the resident could get an infection.</p> <p>An interview on 7/17/24 at 10:50 AM, the Director of Nurses (DON) confirmed that the respiratory therapist was supposed to wear a gown into the room as part of the enhanced barrier precautions and to change out her gloves and wash her hands between the dirty and clean trach care and revealed "that is our standards of practice for tracheostomy care."
