F 602 SS=E	The State Agency (SA) conducted a Complaint Investigation (CI MS # 26990) at the facility on 3/12/25. During the survey the SA determined the facility was in not compliance with the requirements for participation in Medicare and Medicaid. The SA investigated misappropriation of medications and cited F 602. The facility held a license for 120 beds, with a census of 100. Free from Misappropriation/Exploitation CFR(s): 483.12 §483.12 The resident has the right to be free from abuse, neglect, misappropriation of resident property, and exploitation as defined in this subpart. This includes but is not limited to freedom from corporal punishment, involuntary seclusion and any physical or chemical restraint not required to treat the resident's medical symptoms. This REQUIREMENT is not met as evidenced by: Based on staff interview, facility policy review, and record review, the facility failed to ensure a resident's right to be free from misappropriation of property as evidenced by a medication diversion affecting four (4) of six (6) residents reviewed for misappropriation of medication. Residents #1, #2, #3, and #4. Findings Include: Record review of the facility policy titled, "Incident Investigation & Reporting" revised May 2024 revealed "Purpose: 1. Each resident residing in this facility has the right to be free from any type	F 602	*The Licensed Practical Nurse was terminated on November 5, 2024 by Administrator. Resident #3 is the only resident currently in the facility that was affected and was assessed with no adverse findings on November 5, 2024 by the Director of Nursing. A reconciliation of meds was performed by Medical Records Nurse on 11-07-24. *All 100 residents have the potential to be affected by this deficient practice.	3/31/25

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 602	Continued From page 1 of abuse including: verbal, sexual, mental, physical abuse, neglect, exploitation, misappropriation of resident property..." Record review of the facility policy titled, "Destruction of Unused, Expired, or Discontinued Medications" revised 10/2019 revealed, "A. Destruction of Non-Controlled Non-Hazardous Pharmaceutical Waste. The facility will maintain all unused medications and destroy them routinely in compliance with the State and Federal guidelines. Once a prescription is dispensed for a specific person, it is illegal for use for anybody else..." A review of the facility investigation dated 11/5/24 revealed that the Administrator (ADM) received a phone call from the local police department regarding an employee of the facility. According to the police, Licensed Practical Nurse (LPN) #1 was involved in an investigation that led to a search of her home. During the search, authorities discovered multiple blister packs of non-controlled medications belonging to residents of the facility. The facility investigation determined that LPN #1 had removed residents' medications from the medication room after they were discontinued or after a resident expired. Facility staff were re-educated on policies related to ordering, receiving, and discontinuing medications. An Ad Hoc Quality Assurance (QA) meeting was held at the conclusion of the investigation. LPN #1 was terminated and reported to the Board of Nursing. The medication that was taken included Cardizem, Pravastatin, Glucophage, Cipro and Lasix. The only current resident that was affected was assessed with no adverse findings noted.	F 602	*Beginning 03-13-25 Licensed Practical Nurses and Registered Nurses were in-serviced by the Quality Improvement Nurse on the following policies: Unused Medication Return, revised 06-16; Medication Ordering, Reordering and Receiving, revised 12-19; Destruction of Unused, Expired or Discontinued Medication, revised 10-19 and Employee Corporate Compliance Code of Conduct to include Abuse, Neglect, Misappropriation of Resident Property and Elder Abuse Act. In-Servicing will continue until all Licensed Practical Nurses and Registered Nurses have been in-serviced by the Director of Nursing and/or the Staff Development Nurse. A Quality Assurance Committee Meeting was conducted with the Medical Director, Administrator, Director of Nursing, Staff Development/Infection Preventionist, Social Service Designee and the Minimum Data Set Nurse on 3-13-25. The Following policies were reviewed: Medication Ordering, Reordering, and Receiving Procedures, revised 12-19; Unused Medication Return, revised 06-16; Destruction of Unused, Expired or Discontinued Medications, revised 10-19 and Employee Corporate Compliance Code of Conduct to include Abuse, Neglect, Misappropriation of Resident Property and Elder Justice Act with no changes made. Beginning 3-17-25 the Registered Nurse Supervisor and/or Medical Records Nurse will monitor discontinued medications to ensure

F 602	Continued From page 2 During an interview with the Administrator on 3/12/25 at 9:55 AM she verified that the facility was notified by the local police department that multiple blister packs of non-controlled medications belonging to residents of the facility were found in LPN #1's home. She stated that they believed that LPN #1 removed the medications from the medication room after the medications had been discontinued or the resident had expired. During an interview on 3/12/25 at 10:00 AM, LPN #2 stated that when a medication was discontinued, changed, or when a resident expired, the floor nurse was responsible for removing the medication from the medication cart, logging it onto the "Discontinued Medication Log and placing the medication into the secured cabinet in the medication room. She further stated that as far as she knew, only the Director of Nursing (DON) had a key to the cabinet. She added that the DON and another nurse were responsible for destroying medications, although she did not know how often this was done. LPN #2 stated that Administrative Nurses occasionally performed medication reconciliations on the medication carts to ensure there were no discontinued medications left, but she was unsure how frequently this occurred. On 3/12/25 at 10:30 AM, during an interview with the Medical Records Nurse (MRN), she confirmed that she occasionally worked the medication cart when on call. She verified that the process for handling discontinued medications was the same as described by LPN #2. She further stated that she assisted with random medication reconciliations on medication carts but did not keep a record of them. A full	F 602	they are pulled from the medication cart and cubbies and logged in the discontinued medication binder two times a week for three weeks, weekly for four weeks and monthly for two months. Beginning 3-17-25 the Director of Nursing will monitor that logged in medications are locked in the medication box to be destroyed and distinguish between what is logged and what is in the box to ensure no discrepancies. Medications will be destroyed every two weeks for one month and monthly thereafter by the Director of Nursing and another nurse at that time. The Registered Nurse Supervisor and/or Medical Records Nurse monitoring will be documented on the discontinued medication list and maintained by the Director of Nursing. The medication destruction will be recorded on the individual medication destruction sheets and maintained by the Director of Nursing. *The Quality Assurance Committee consisting of the Medical Director, Administrator, Director of Nursing, Staff Development Nurse/Infection Preventionist, Minimum Data Set Nurse and Social Service Designee will meet on March 27, 2025 and monthly for three months to discuss findings or make changes or recommendations as needed to ensure compliance is achieved.

F 602	Continued From page 3 medication reconciliation was conducted after the discovery of LPN #1's theft. She did not recall when the last reconciliation was done before the incident and confirmed no reconciliations had been conducted since. In a telephone interview on 3/12/25 at 11:49 AM, with the former DON, she verified that while she was the DON it was the practice of a facility that when a medication was discontinued, changed or the resident expired the floor nurse was responsible for removing the medication from the med cart, logging it on to the "Discontinued Medication Log" and placing it into the secured cabinet in the medication room. She stated that she was the only one with a key to the discontinued medication cabinet and that she destroyed the medications monthly and as needed. She verified that based on the facility investigation they felt that LPN #1 took the identified medications out of the medication room after they were discontinued, or the resident expired. She stated that sometimes the newer nurses will just lay the cards on the counter and not log them in or put them in the secured cabinet and that is how they felt LPN #1 gained access to the medications. The DON stated that she did not identify which nurses specifically were not following the protocol she just in serviced everyone on how it was to be done. The DON further stated that she did not initiate any audits to ensure that the staff was following the protocol and did not perform any further medication reconciliations on the med carts. During an interview on 3/12/25 at 11:56 AM, the Administrator (ADM) stated that she was not aware of any audits or follow-up medication reconciliations being performed.	F 602

F 602	Continued From page 6 Administer 1 tablet by mouth at night daily from 12/8/23 through 1/15/24 when it was discontinued. Record review of the "Face Sheet" revealed the facility admitted Resident #4 on 12/8/23 with a diagnosis of Hyperlipidemia, and the resident discharged on 1/20/24. On 3/12/25 at 1:30 PM, during an interview and review of delivery dates and active order dates of the medications discovered at LPN #1's home with the ADM, she verified that they had no logs showing if or when the medication cards were removed from the cart. She stated that based on the dates there was no way to determine when LPN #1 removed the medication cards from the facility; or if she removed them from the medication cart or the medication room after they were discontinued. She stated that it was her expectation that the nurse would not have taken the residents' medications. She agreed that misappropriation of a resident's medication could lead to a resident not receiving medications ordered by their physician.	F 602
