F0000	INITIAL COMMENTS The State Agency (SA) conducted a Complaint Investigation (CI), MS #500585, at the facility on 7/24/25. CI MS #500585 was investigated related to quality of care, call bells, nursing services, and staffing. During the survey, the SA determined the facility was not in compliance with the requirements for participation in Medicare and Medicaid and cited F658 and F760. The facility held a license for 60 beds, with a census of 53.		F0000			08/08/2025	
F0658 SS = G	Services Provided Meet Professional Standards CFR(s): 483.21(b)(3)(i) §483.21(b)(3) Comprehensive Care Plans The services provided or arranged by the facility, as outlined by the comprehensive care plan, must- (i) Meet professional standards of quality. This REQUIREMENT is NOT MET as evidenced by: Based on interviews, record review, and facility policy review, the facility failed to ensure that medications were administered in accordance with accepted standards of nursing practice and professional guidelines for one (1) of four (4) sampled residents (Resident #1) as evidenced by Licensed Practical Nurse (LPN) #1 failed to verify the resident's identity before administering medications and pre-pulled medications without immediate administration, resulting in Resident #1 receiving another resident's medications. This error caused the resident to experience an adverse drug reaction, decreased level of consciousness, and required transfer to an acute care hospital for intravenous (IV) fluids, potassium therapy, oxygen therapy, and observation. Findings include: A review of the facility's policy titled "Administering Medications," revised April 2019, revealed,		F0658	F-658 On 5/15/2025 Resident #1 was assessed by Registered Nurse (RN) Supervisor and orders received to transfer to the local hospital emergency room for evaluation and treatment. Licensed Practical Nurse (LPN) #1 was immediately removed from the medication cart, counseled, educated on medication administration policies and procedures, and medication skills competency evaluation was completed by the Quality Assurance (QA) nurse. Resident #1 returned to the facility 5/16/2025 with no further adverse effects noted. Resident #1 discharged home on 5/17/2025 On 5/15/2025 the QA Nurse audited medication cart and census reviewed for all Residents being cared for by LPN #1 and twenty five (25) Residents had the potential to be affected. To protect Residents from similar occurrences LPN #1 counseled, educated on medication administration policies and procedures, and medication skills competency evaluation was completed by the Director of Nursing (DON) and QA Nurse on 5/15/2025. QA Nurse began medication cart audits 5/15/2025. QA team met 5/19/2025 and reviewed findings. All nurses completed in-service training on 5/23/2025. Annual skills competencies for all nurses were completed 7/10/2025. On 7/24/2025 four (4) LPN's and four (4) RN's were educated on medication administration and completed skills competencies for		08/08/2025	

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See reverse for further instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F0658 SS = G	Continued from page 1 "...Medications are administered in a safe and timely manner, and as prescribed. Policy Interpretation and Implementation...9. The individual administering the medication verifies the resident's identity before giving the resident his/her medications..." A record review of the facility's investigation revealed that on 5/15/25, at 10:09 AM, Licensed Practical Nurse (LPN) #1 administered medications to Resident #1. Resident #1 was assessed at 11:47 AM and received an order for evaluation at the Emergency Room (ER) at 12:10 PM. A Certified Nurse Aide (CNA) reported that she attempted to wake Resident #1 for lunch and saw a medication cup in the resident's trash can labeled with another resident's name. Resident #1 was treated with intravenous fluids and potassium replacement and remained in the ER overnight for observation. A review of the "Medication Error Report," dated 5/16/25, revealed, "...resident received wrong medication. Meds had been placed in cups with res (resident) names on cups. Wrong med cup given to resident. AEB (As evidenced by) a cup with another resident's name found in trash can..." A record review of a handwritten statement by LPN #1, dated 5/18/25, revealed, "On 5/15/25 during my med (medication) pass I accidentally administered the wrong medication to a resident...I take full responsibility for this error and deeply regret any distress or risk caused to the resident..." A record review of the acute hospital documentation for Resident #1 revealed, "...Brought from rehab with report of possible seizure less than 30 minutes ago...Upon assessment by staff she was noted to be drowsy but would clasp hands together and move extremities spontaneously. Upon arrival to ED (Emergency Department), CNA from the rehab disclosed she saw a cup of pills that may have not belonged to the patient. Nursing staff reported she may have received another patient's meds to include Vimpat, Keppra, Gabitril, hydrocodone, and clonazepam..." Further review revealed the resident received Intravenous (IV) Normal Saline with potassium and was administered four (4) liters of oxygen at the hospital. A record review of the "Admission Record" revealed the facility admitted Resident #1 on 5/10/25 with diagnoses including Chronic Obstructive Pulmonary Disease (COPD) and Type 2 Diabetes Mellitus. A record review of the Admission Minimum Data Set (MDS)			F0658	Continued from page 1 medication administration all remaining nurses completed on 7/30/2025. On 7/25/2025 orientation and facility requirements to include medication administration training and competencies for all agency nurses was implemented and required to be completed prior to being allowed to work. Pharmacy consultant observed medication administration with two (2) LPN's and completed audits on both medication carts on 7/31/2025 An audit tool will be completed by the DON, QA Nurse, or the Staff Development Nurse to monitor and ensure that medications are administered in accordance to accepted standards and professional guidelines for Resident safety and regulatory compliance and that agency nurse orientation requirements and competencies are completed prior to being allowed to work. Initial monitoring began 7/24/2025 and will be completed weekly x 4 weeks, then monthly x 3 months, then quarterly x 1 year. Quality assurance performance improvement (QAPI) meeting is scheduled for 8/7/2025 to review audit logs to ensure compliance is achieved. QAPI committee will continue to review audit logs quarterly x 1 year to ensure compliance is sustained.		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTIONS		(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 255277		(X2) MULTIPLE CONSTRUCTION A. BUILDING B. WING		(X3) DATE SURVEY COMPLETED 07/24/2025

F0658 SS = G	Continued from page 2 with an Assessment Reference Date (ARD) of 4/21/25, revealed Resident #1 had a Brief Interview for Mental Status (BIMS) score of 15, which indicated she was cognitively intact. On 7/24/25 at 11:40 AM, during an interview, CNA #1 stated that when she entered Resident #1's room, she found the resident slumped in a chair, unresponsive to voice, and minimally responsive to physical stimulation. She noted this was not normal for the resident. While assisting the resident, CNA #1 observed a medication cup in the resident's trash can labeled with another resident's name. Recognizing a potential error, she immediately notified Registered Nurse (RN) #1. On 7/24/25 at 12:12 PM, during an interview, RN #1 stated that after being informed of a change in Resident #1's responsiveness, she immediately assessed the resident and noted the altered mental status. She notified the Nurse Practitioner (NP), who recommended transfer to the emergency department. RN #1 reported that CNA #1 informed her of the medication cup found in the room and that it was labeled with another resident's name. RN #1 stated that when she became aware that the medications given to the resident were not hers, she provided the NP with the full medication list that matched the other resident. On 7/24/25 at 1:00 PM, during an interview with Director of Nursing (DON), she confirmed that on 5/15/25, LPN #1, an agency nurse, pre-pulled Resident #2's medication and labeled the cup. The DON explained that the resident was in the shower, and the nurse intended to administer them once the resident returned. However, LPN #1 later administered the medication to Resident #1 without confirming the residents' identity. The DON acknowledged that this action violated the facility's medication administration policy and the professional nursing standard known as the "five rights" (right resident, right medication, right dose, right route, and right time). The DON confirmed that this failure did not reflect the standard of nursing care expected at the facility. She confirmed that LPN #1 did not pre-pull medications for any other residents and that this was an isolated occurrence. She further confirmed that Resident #2 later received the correct medications. On 7/24/25 at 1:30 PM, during an interview with the Administrator, she confirmed that LPN #1's actions did not meet the professional standards of nursing care. The Administrator stated that all licensed nurses are expected to follow the five rights of medication	F0658					

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTIONS		(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 255277		(X2) MULTIPLE CONSTRUCTION A. BUILDING B. WING		(X3) DATE SURVEY COMPLETED 07/24/2025

F0658 SS = G	Continued from page 3 administration and verify resident identity prior to administration. She acknowledged that pre-pulling medications, even with the intent to administer them shortly after, is not permitted under facility policy and creates an increased risk of error. On 7/24/25 at 5:00 PM, during a phone interview with LPN #1, she confirmed that on 5/15/25 she placed Resident #2's medications in a cup and labeled it with the resident's name. She reported doing so because Resident #2 was in the shower, and she intended to administer the medications afterward. LPN #1 acknowledged that she mistakenly administered the pre-pulled medications to Resident #1, believing she had the correct resident. She stated that pre-pulling medications is not her routine practice, but she made the decision that morning due to a busy med pass and multiple residents being in the shower. She admitted that she failed to follow the five rights of medication administration and that her actions were a mistake.	F0658					
F0760 SS = G	Residents are Free of Significant Med Errors CFR(s): 483.45(f)(2) The facility must ensure that its- §483.45(f)(2) Residents are free of any significant medication errors. This REQUIREMENT is NOT MET as evidenced by: Based on interview, record review, and facility policy review, the facility failed to ensure that a resident was free from a significant medication error for one (1) of four (4) sampled residents, as evidenced by Resident #1 received another resident's medications, which caused a change in mental status requiring hospital evaluation, overnight observation, and treatment, including intravenous (IV) fluids, potassium replacement, and oxygen therapy. Findings include: A review of the facility's policy titled, "Administering Medications," revised April 2019, revealed, "...Medications are administered in a safe and timely manner, and as prescribed...9. The individual administering the medication verifies the resident's identity before giving the resident his/her medications..."
