With the assistance of the Director of Nursing (DON) the resident's fingernails were assessed and noted to be long, rough, and jagged.</p> <p>On 1/27/23 at 11:15 AM, during an interview the DON, she confirmed that Resident #7's fingernails were long. She said that fingernails and toe nails were to be assessed by nurses and CNAs on an ongoing basis and fingernail and toenail care should be provided by staff as needed. She confirmed that there were criteria for CNAs to be able to use clippers to trim fingernails or toenails, but the CNAs responsibility included reporting to the nurse if a resident needed care and they were not able to provide the care.</p> <p>Record review of the "Admission Record" for</p> | M 610                                                                                      |                                                                                                                          |                                                                    |

She reported each resident was scheduled for showers every week, most every other day, and that fingernail care was "supposed to be done on shower days". She said that if a resident was diabetic, had physician orders for anticoagulant therapy or was diagnosed with a bleeding disorder, the CNA should report to a licensed nurse if the resident's nails needed trimming, but they were allowed to use an emery board as needed to file or smooth any resident's nails.</p> <p>On 1/27/23 at 2:00 PM during an interview the Staff Development Nurse (SDN), he stated that</p> | M 610                                                                                      |                                                                                                                          |                                                                    |
