C 189	Continued From page 1 care home shall be maintained in a safe and operating condition. (k) This Rule shall apply to new and existing facilities with the exception of Paragraph (e) which shall not apply to existing facilities. This Rule is not met as evidenced by: 1. Based on observation, the sampling tube for the duct mounted smoke detector was dirty. Sampling tubes that are not periodically inspected and cleaned can endanger all residents and staff because the duct detector may fail to operate properly. 2. Based on observation the required one-hour fire rated walls and/or ceilings were compromised in locations. Holes and penetrations that are not sealed with materials approved for use in one-hour fire rated construction present the possibility that a fire that begins in one space can quickly spread to other areas of the facility. Findings include: a. Holes in the ceiling of the mop room, b. Holes in the ceiling of the laundry.	C 189
