D 358	Continued From page 3 normal blood pressure for Resident #2, but she had held the Lisinopril 40 mg when she had worked the medication cart. -She could not speak for the other MAs and exactly what they were doing. -When she had held the Lisinopril 40 mg she would document on the eMAR it was held. Interview on 1/20/17 at 8:30 am with the Resident Care Coordinator revealed: -She had been the only nurse in the facility for several months. -Her responsibilities included overseeing the clinical staff and reviewing day to day orders from the physicians. -She was not aware of Resident #2's order for Lisinopril 40 mg daily, hold if systolic blood pressure was less than 140. -She thought the order was confusing and could see why some of the MAs had administered the Lisinopril 40 mg when the systolic blood pressure had been less than 140. -"The order should had been clarified, if it does not make sense to me then it probably did not make sense to the MAs either. " -The nurses were responsible for reviewing and clarifying new orders. Telephone interview on 1/20/17 at 11:10 am and on 1/24/17 at 1:50 pm with the nurse from Resident #2's physician office revealed: -She was unaware of the order for holding the Lisinopril 40 mg, but would speak to the physician concerning the order. -The facility submitted Resident #2's blood pressures monthly for the physician to review, all the blood pressures had been stable with no changes to the order for Lisinopril 40 mg daily. -The order on file was to administer Lisinopril 40 mg daily.
