{C 110}	Continued From page 1 Sanatoriums, and Educational and Other Institutions". Specifically 15A NCAC 18A .1317 (a) [which requires that] Effective measures shall be taken to keep... vermin out of and to prevent their breeding and presence on the premises. The facility did not have effective measures to prevent bed bugs from being present on the premises. Findings on February 15, 2019: Interview with staff revealed that the exterminator comes monthly and for inspections and treatment. The last treatment was January 30, 2019. According to the report, activity was found in Rooms 25, 29, 38, 42 and 45. Staff also listed Rooms 21, 44 and 49. An inspection of the following rooms indicate the findings listed below: (a) Room 19 - there appeared to be one dead bedbug on the bedding of the first bed. (b) Room 20 - small black spots similar in composition to fecal stains were observed at the wall/ceiling juncture along the shared wall. (c) Room 24 - small, dark spots in the corner indicate possible activity. (d) Room 28 - small dark spots indicative of fecal stains were observed at the wall/ceiling juncture of the corridor wall and around the top of the door frame. (e) Room 44 - the bed pillow was several blood spots that had faded from washing. There were several black spots on the wall behind the second bed that appeared to be fecal stains. (f) Room 45 - the bed pillow had faded blood stains. There were small black dots similar in appearance to fecal observed at the corridor wall. New observations based on rooms found to have	{C 110}
