D 601	Continued From page 1 department (LHD) were implemented and maintained to provide protection to the residents in the facility during the global Coronavirus (COVID-19) pandemic related to the accessibility and use of personal protective equipment (PPE) by staff and residents. The findings are: Review of the Center for Disease Control (CDC) guidelines for the prevention and spread of the coronavirus in a long term care (LTC) facilities revealed: -Personnel should always wear a face mask in the facility. -Face masks should not be worn under the nose or mouth. -If COVID-19 is identified in the facility, restrict all residents to their rooms. -Residents with known or suspected COVID-19 should be cared for using recommended personal protective equipment (PPE) including eye protection, gloves, gown, and a N95 respirator face mask. -A surgical mask can be used if a N95 mask is not available. -If a gown is available, a gown should be worn for activities where splashes or sprays are anticipated, or high-contact resident care activities. -High contact activities include transferring, dressing, showering, changing linens and providing toileting assistance. -When a resident is awaiting transfer, resident should be separated from others and should wear a cloth face covering or facemask. -Appropriate PPE should be used by personnel when coming in contact with the resident.	D 601	D601 Continued - Monitoring for proper use of PPE will be done by ED/DRC/Supervisor In Charge (SIC) or designee daily and reviewed or revised by ED/DRC weekly for 3 months to ensure monitoring. Results will be recorded on PPE Daily form. - Monthly QA/QI review of proper use of PPE and availability reviewed or revised for 3 months for compliance.	12/19/20

D 601	Continued From page 2 Review of the North Carolina Department of Health and Human Services (NCDHHS) for prevention and spread of the coronavirus in LTC facilities revealed: -Facility staff should wear appropriate personal protective equipment (PPE) when caring for patients with undiagnosed respiratory infection or confirmed COVID-19. -All facility staff should wear a face mask while in the facility. -Facility staff should wear all recommended PPE, including a surgical mask or N95 mask, gown, gloves and face shield when caring for all residents whether they have tested positive for COVID-19 or not. Review of the facility's Infection Control Policy revealed: -Adequate PPE should always be available. -Staff should wear gloves, facemasks (surgical or N95 masks), eye shield or goggles and gowns when touching an ill resident, potentially contaminated environmental surfaces, or items potentially contaminated with respiratory secretions, contaminated tissues, vomit or fecal matter. -Change gloves and gowns after each encounter with an ill resident and perform hand hygiene. -Place a surgical or procedure mask over the ill resident's nose and mouth, if tolerated, when transport or movement of the resident is necessary outside of their room. Interview with the "acting" Resident Care Coordinator (RCC) on 11/10/20 at 11:30am revealed there were currently 47 residents and 10 facility staff who had tested positive for COVID-19 as of the last testing date of 11/09/20. D 601	Continued From page 3 11/12/20 at 3:45pm revealed there were five residents who had tested positive for COVID-19 had passed away since 10/28/20. Observation of a personal care aide (PCA) exiting a resident's room on 11/10/20 at 10:45am revealed: -She was wearing a mask, goggles, gown, and gloves. -She removed her gown and gloves, disposing them into a trash bag hanging from the hand rail outside the room. -She removed the trash bag with the dirty gown and gloves and placed it in a large trash can in the hallway. -She applied hand sanitizer to her hands. Observation of the activity room on 11/10/20 at 10:56am revealed there were two residents sitting more than 6 feet apart from each other not wearing masks. Interview with the MA on 11/10/20 at 11:00am revealed: -She was using a spray bottle filled with alcohol to spray and wipe down high-touch surface areas. -The clear trash bags hanging from the hand rail outside each resident room was for disposing of dirty PPE when exiting resident rooms. -Staff had been wearing masks and goggles since the beginning of COVID-19. -After the first resident was diagnosed as positive with the COVID-19 virus, staff wore gowns and gloves in addition to face masks and goggles. -New gowns and gloves were applied between each resident. -The Corporate Nurse provided additional infection control training to all staff, which included applying and taking off PPE and washing hands.
