(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETION DATE
K 000	INITIAL COMMENTS This survey used the 2012 edition of NFPA 101, Life Safety Code, Chapter 19-Existing Health Care Occupancies and the 2012 edition of NFPA 99, Health Care Facilities Code in compliance with 42 CFR 483.70(a)(b). The findings that follow demonstrate noncompliance with these standards. The facility was located in a two-story combined Hospital and Long-Term Care building of Type II (000) construction that was separated from residential living apartments with a two-hour fire resistance rated occupancy separation. The building was protected by a wet automatic fire sprinkler system designed to meet the requirements of NFPA 13, Standard for the Installation of Sprinkler Systems.	K 000		
K 345 SS=F	Fire Alarm System - Testing and Maintenance CFR(s): NFPA 101 Fire Alarm System - Testing and Maintenance A fire alarm system is tested and maintained in accordance with an approved program complying with the requirements of NFPA 70, National Electric Code, and NFPA 72, National Fire Alarm and Signaling Code. Records of system acceptance, maintenance and testing are readily available. 9.6.1.3, 9.6.1.5, NFPA 70, NFPA 72 This REQUIREMENT is not met as evidenced by: Health care occupancies shall be provided with a fire alarm system in accordance with Section 9.6. 19.3.4.1 A fire alarm system required for life safety shall be installed, tested and maintained in	K 345	K 345: It is the policy of the Ashley Medical Center that the facility must ensure that Testing and Maintenance of the fire alarm system are in accordance with NFPA 101	1/3/18

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETION DATE
K 345	Continued From page 1 accordance with the applicable requirements of NFPA 70, National Electrical Code, and NFPA 72, National Fire Alarm and Signaling Code. 9.6.1.3 The facility failed to test the fire alarm system as required. Review of documentation determined device test results (alarm initiating, supervisory alarm initiating, and notification) did not provide an itemized list with the device type, address, location, and test result as required. Failure to install, test and maintain the fire alarm system in accordance with NFPA 72 increases the risk of death or injury due to fire. This deficiency affected one (1) of one (1) fire alarm system. The fire alarm system serves the entire facility.	K 345	complying with the requirements of NFPA70, National Electric Code, and NFPA 72, National Fire Alarm and Signaling Code. This was completed through notification of AVI Systems of the requirement of an itemized list with the device type, address, location, and test result. AVI completed testing on 12/27/2017. We received the required documentation on 1/03/2018 via fax. This will be completed on an annual basis. Environmental service director will monitor it for compliance. A QA will be done annually for two years. Responsible Parties: Environmental Service Director.	
K 351 SS=D	Sprinkler System - Installation CFR(s): NFPA 101 Spinkler System - Installation 2012 EXISTING Nursing homes, and hospitals where required by construction type, are protected throughout by an approved automatic sprinkler system in accordance with NFPA 13, Standard for the Installation of Sprinkler Systems. In Type I and II construction, alternative protection measures are permitted to be substituted for sprinkler protection in specific areas where state or local regulations prohibit sprinklers.	K 351		1/3/18

ASHLEY MEDICAL CENTER NURSING HOME	**612 CENTER AVE N** **ASHLEY, ND 58413**

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETION DATE
K 351	Continued From page 2 In hospitals, sprinklers are not required in clothes closets of patient sleeping rooms where the area of the closet does not exceed 6 square feet and sprinkler coverage covers the closet footprint as required by NFPA 13, Standard for Installation of Sprinkler Systems. 19.3.5.1, 19.3.5.2, 19.3.5.3, 19.3.5.4, 19.3.5.5, 19.4.2, 19.3.5.10, 9.7, 9.7.1.1(1) This REQUIREMENT is not met as evidenced by: Sprinklers in the high-temperature zone shall be of the high-temperature classification, and sprinklers in the intermediate-temperature zone shall be of the intermediate-temperature classification. NFPA 13 8.3.2, 8.3.2.5(1), Table 8.3.2.5(a)(2) The facility failed to install the automatic sprinkler system in accordance with NFPA 13, Standard for the Installation of Sprinkler Systems to provide adequate coverage for all portions of the building. Observation determined one (1) sprinkler in the Garage installed between 7 ft. and 20 ft. on the discharge side of a horizontal discharge unit heater was not intermediate-temperature-rated. NFPA 13 requires intermediate-temperature-rated sprinklers within a 7 ft. to 20 ft. radius pie-shaped cylinder extending 7 ft. above and 2 ft. below horizontal discharge heaters on the discharge side; also a 7 ft. radius cylinder more than 7 ft. above horizontal discharge unit heaters. Failure to install and maintain the automatic sprinkler system in accordance with NFPA 13 increases the risk of injury and death due to fire.	K 351	K 351: It is the policy of the Ashley Medical Center that the facility must ensure the automatic sprinkler system meets the Standard for the Installation of Sprinkler Systems in accordance with NFPA 13. This has been done with the installation of one (1) intermediate-temperature- rated head, replacing the ordinary-temperature-rated sprinkler head in the garage that was in a 7 ft. to 20 ft. radius of a horizontal discharge heater on the discharge side. Environmental service director will monitor rest of building for compliance. A QA will be done Bi-Annually for one year. Responsible Parties: Environmental Service Director.
