K 000	INITIAL COMMENTS This survey used the 2012 edition of NFPA 101, Life Safety Code, Chapter 19-Existing Health Care Occupancies and the 2012 edition of NFPA 99, Health Care Facilities Code in compliance with 42 CFR 483.70(a)(b). The facility was located in a one-story building of Type V (000) construction with a partial basement. A one-story Hospital addition of Type II (000) construction was attached to the facility to the west. A one-story Clinic, Imaging, and Lab addition of Type II (111) construction was attached to the facility to the south. An apartment building, separated by an occupancy separation wall having a two-hour fire resistance rating, was attached to the facility to the east. Due to the lack of a 2-hour fire resistant rated barrier separating the facility and the additions, the Clinic, Imaging, Lab and Hospital Swing Bed Activity Room were included in this survey. The facility was protected throughout by a wet and dry automatic sprinkler system designed to meet the requirements of NFPA 13, Standard for the Installation of Sprinkler Systems. Observation and records review determined the facility to be in compliance with the minimum requirements of the 2012 Life Safety Code and NFPA 99, Health Care Facilities Code.			K 000
