K 000	A recertification survey conducted on August 31, 2021 found St. Luke's Home in compliance with the requirements of 483.73 Long Term Care Emergency Preparedness. INITIAL COMMENTS This survey used the 2012 edition of NFPA 101, Life Safety Code, Chapter 19-Existing Health Care Occupancies and the 2012 edition of NFPA 99, Health Care Facilities Code in compliance with 42 CFR 483.70(a)(b). The St. Luke's Home was located in a two-story building of Type II (111) construction and a one-story building of Type II (000) construction. A two-hour fire resistance rated construction barrier provided separation between the two-story building and the one-story building. The building was protected throughout by a wet/dry automatic fire sprinkler system designed to meet the requirements of NFPA 13, Standard for the Installation of Sprinkler Systems. A two-hour fire resistance rated occupancy barrier provided separation to an apartment building to the northeast. Observation and records review determined the facility to be in compliance with the minimum requirements of the 2012 Life Safety Code and NFPA 99.			K 000
