F 678 SS=J	The complaint survey started on March 4, 2020 and was completed on March 5, 2020. An extended survey subsequent to the complaint survey was completed on March 11, 2020. Cardio-Pulmonary Resuscitation (CPR) CFR(s): 483.24(a)(3) §483.24(a)(3) Personnel provide basic life support, including CPR, to a resident requiring such emergency care prior to the arrival of emergency medical personnel and subject to related physician orders and the resident's advance directives. This REQUIREMENT is not met as evidenced by: Based on record review, information from the complainant, review of the facility reported incident investigation, review of facility policies, review of personnel records, and staff interview, the facility failed to immediately start Cardiopulmonary Resuscitation (CPR) on 1 of 1 closed resident record (Resident #1) who requested CPR in the event of absence of pulse or respirations. Failure to immediately start CPR contributed to Resident #1's death. During the complaint survey on March 4, 2020, the survey team determined a potential Immediate Jeopardy (IJ) situation existed. The IJ potential resulted from review of Resident #1's medical record, the facility reported incident investigation, personnel records, and staff interview which showed residents were placed in an immediate dangerous situation due to the delay of CPR. 03/04/20 at 5:10 p.m. - The survey team			F 678	It is the intent of this facility to maintain compliance with F 678- Cardiopulmonary Resuscitation. Corrective action was taken on nurse with deficient practice. Nurse was immediately suspended, removed from schedule and subsequently terminated. The deficient practice had the potential to affect all residents with advanced directives to resuscitate or requiring Cardiopulmonary Resuscitation (CPR). A review of Code Status forms was conducted on 2/26/2020 to ensure all resident had a complete form. This also identified all residents requesting Cardiopulmonary Resuscitation. Review of Cardiopulmonary Resuscitation policy and Advance Directives policy including education was completed with each nurse individually starting on 3/4/2020. Each nurse was able to verbalize when they would initiate		3/18/20

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 678	Continued From page 1 contacted the management staff at the State Survey Agency (SSA) to report the findings and to discuss a potential IJ situation. 03/04/20 at 5:55 p.m. - The survey team notified facility administration of the IJ situation and requested they develop a plan for abatement of the immediate jeopardy. 03/05/20 at 10:20 a.m. - The SSA notified the regional office of the immediate jeopardy situation. 03/05/20 at 1:30 p.m. - The survey team determined the IJ situation at a scope/severity of J was abated and reduced to a scope/severity of G. Findings include: Review of the facility policy titled "CARDIOPULMONARY RESUSCITATION (CPR)" occurred on 03/04/20. This policy, revised December 2019, stated, "... Cardiopulmonary Resuscitation (CPR) certification is mandatory for all licensed nursing employees. Each location will assign an employee responsible to be sure that all licensed nurses have current CPR certification. This will be reported to the administrator annually. ... CPR must be initiated unless the resident has a do not resuscitate (DNR) order, the resident has no advance directive on file, the resident does not have a valid DNR on file that includes a medical order issued by a physician or other authorized non-physician practitioner (sic) the resident has obvious signs of clinical death ..."	F 678	Cardiopulmonary Resuscitation according to the policy as well as the locations of each patients advance directive. Verification of all Cardiopulmonary Resuscitation certification cards was completed on 3/4/2020. All licensed nurses were certified by 3/5/2020. Education was provided to all staff via OnShift (messaging/scheduling software) on 3/4/2020 regarding location of Automatic External Defibrillator and crash cart in the event they are ever asked to retrieve it in an emergency. Facility has developed a process to track cardiopulmonary resuscitation certification for all nurses. The CPR tracker will be maintained by the Director of Nursing and/or her designee and will be audited by the QA coordinator and/or her designee weekly x 4, then monthly x 3. Results will be reviewed with the QAPI team including the medical director. Further QA per their recommendation. Mock Code training of emergency situations including location of crash cart/Automatic External Defibrillator and its contents, will be completed biannually at interdepartmental nursing meetings beginning 3/18/2020 at 1500. In addition, Audits will be completed by the QAPI coordinator and/or her designee weekly x 4, then monthly x 3. Results will be reviewed with the QAPI team including the medical director. Further QA per their recommendation. Date Certain: 3/18/2020

F 678	Continued From page 2 Review of the facility policy titled "ADVANCE CARE PLANNING AND ADVANCE DIRECTIVES" occurred on 03/04/20. This policy, revised April 2016, stated, ". . . PURPOSE: To provide each resident the opportunity to make decisions regarding future medical care . . . Cardiopulmonary Resuscitation (CPR): Any medical intervention used to restore circulatory and/or respiratory function that has ceased. . . . Residents . . . have the right to make decisions concerning medical care, including the right to accept or to refuse medical or surgical treatment. . . ." Review of Resident #1's medical record occurred on 03/04/20 and identified medical diagnoses including sepsis due to streptococcus, cellulitis of lower limbs, type 2 diabetes, multiple myeloma, anemia, hyponatremia, and hypertension. Resident #1's North Dakota Physician Orders for Life Sustaining Treatment (ND POLST), signed by Resident #1 on admission (02/07/20), identified the following instructions: "FIRST follow these orders, THEN call the appropriate medical contact. These medical orders are based on the patient's medical condition and wishes. Any section not completed implies full treatment for that section. Everyone shall be treated with dignity and respect." Resident #1's POLST identified the following: "A. CARDIOPULMONARY RESUSCITATION (CPR): CPR/ATTEMPT RESUSCITATION . . . B. MEDICAL INTERVENTIONS: Patient has a pulse and/or is breathing : FULL TREATMENT - Use all appropriate medical and surgical interventions as indicated to support life. Transfer to hospital if indicated. Includes intensive care. . . .C.	F 678

F 678	Continued From page 8 confirmed the nurse's documentation was not accurate. Review of personnel records for all nursing staff on 03/04/20, identified four (4) nurses lacked evidence of CPR certification. Review of Nurse #1's personnel file lacked evidence of CPR certification. Nurse #1's personnel file identified the following statement from the nurse regarding the incident with Resident #1: "When I was visiting with the other staff nurse [he/she] had asked me if I had started CPR. I informed [him/her] I didn't because I didn't think that I needed to due to his heart rate had stopped. [He/she] said Ok then you should contact [name of unit manager], the floor coordinator or physician. I contacted [name of provider] since [he/she] was the on call physician. [He/she] asked if I started CPR. I said no. She told me that I needed to start CPR. So I went and started CPR. . . ." Review of the facility's resident code status report identified 22 residents (current census of 116) requested CPR in the event of absence of respirations or heartbeat. The facility nurse (#1) failed to immediately initiate CPR after assessment that Resident #1 did not have an apical heartbeat and no response to a sternal rub. The facility failed to provide documentation of nurses' education regarding location of residents' code status, when to initiate CPR, and to ensure all nurses had current CPR certification. These actions contributed to the death of Resident #1 and the potential for other residents to be affected by the deficient practice.			F 678
