WAC 388-76-10285 Tuberculosis Two step skin testing. Unless the person meets the requirement for having no skin testing or only one test, the adult family home, choosing to do skin testing, must ensure that each person has the following two-step skin testing:

- (1) An initial skin test within three days of employment; and
- (2) A second test done one to three weeks after the first test.

This requirement was not met as evidenced by:

Based on interview and record review, the Adult Family Home (AFH) failed to ensure that 1 of 2 sampled Staff (Staff D, Caregiver) completed two step Tuberculin (TB) skin testing. This failure placed residents a risk of being exposed to a communicable disease.

Findings included...

Review of the Dear Provider Letter titled, Reinstatement of Tuberculosis Testing Requirements July 1, 2022, dated May 17, 2022 and amended May 26, 2022, showed that the emergency rules set in place to suspend TB skin testing were due to expire on July 1, 2022. Residential Care Services (RCS) facilities were not required to have staff TB skin tested. The Dear Provider Letter showed that RCS encouraged Providers to immediately begin staff TB testing to allow time for compliance by July 1, 2022.

Review of employee records, on 06/01/2023, showed that Staff D was hired on 06/09/2022. The first TB skin test was completed on 04/15/2022 and showed a negative result. Staff D did not initiate TB testing within 3 days of hire. Staff D's employee file did not contain evidence of a second TB skin test.

During an interview, on 06/01/2023 at 1:30 PM, Staff A (Entity Representative) stated that they thought that Staff D completed the TB testing.

In an interview, on 06/01/2023 at 1:30 PM, Staff D stated that they had not completed the second TB skin testing. Staff D stated that they did not know they needed two TB skin tests.

In an interview, on 06/05/2023 at 1:55 PM, Staff A stated that they did not realize Staff D's first TB skin test was done 2 months before their hire date.
