WAC 388-76-10805 Automatic smoke alarms.

(3) The home must ensure the smoke alarms in all parts of the home are active and interconnected in such a manner that the activation of one alarm will activate them all. Physical interconnection of smoke alarms shall not be required where listed wireless alarms are installed and all alarms sound upon activation of one alarm.

(4) Each smoke alarm must be kept in working condition at all times.

This requirement was not met as evidenced by:

Based on observation and interview, the Adult Family Home (AFH) failed to ensure smoke detectors were kept in working condition for 3 of 6 bedrooms (Bedroom A, Bedroom D, Bedroom E) and failed to ensure that automatic smoke detectors were interconnected. These failed practices placed all residents, staff and visitors at risk of harm in the event of a fire emergency.

Findings included...

An unannounced licensing inspection was initiated on 11/03/2025.

On 11/03/2025 at 01:47 PM, during the tour of the AFH with provider testing of the smoke detector in Bedroom A, Bedroom D, Bedroom E revealed it to not be working. The smoke detector in the hallways was activated and noted not to activate the other alarms in the home, as required.

Observation on 11/05/2025 at 02:35 PM, showed Caregiver C was observed trying to fix the smoke detectors in Bedroom A, Bedroom D, Bedroom E, but it did not work.
