M 570	88.10(3)(I) Safe Physical Environment Individuals, except for correctional residents, have basic rights which they do not lose when they enter an adult family home. A resident shall have a safe environment in which to live. The adult family home shall safeguard residents who cannot fully guard themselves from environmental hazards to which they are likely to be exposed, including conditions which would be hazardous to anyone and conditions which would be or are hazardous to a particular resident because of the resident's condition or disability. This Rule is not met as evidenced by: Based on observation, and interview, the provider did not ensure 3 of 3 residents were safeguarded from environmental hazards. The hot water coming from the kitchen and bathroom faucets was 135° Fahrenheit (F). Findings include: This facility was licensed on 12/10/2013 to serve up to 4 ambulatory residents in the client groups	M 570

M 570	Continued From page 1 of advanced age, developmentally disabled, emotionally disturbed/mental illness, correctional clients, terminally ill, irreversible dementia/Alzheimer's, traumatic brain injury, physically disabled and alcohol/drug dependent. On 01/05/2026, at approximately 11:00 AM, Surveyor, accompanied by Caregiver B, tested the hot water temperature from the resident kitchen and bathroom sink faucet. The hot water was 135° F. Caregiver B confirmed the residents were independent while in the bathroom. On 01/05/2026, at 12:15 PM, Surveyor interviewed Licensee A regarding the hot water temperature. Licensee A confirmed they had tested the hot water monthly so s/he was surprised it was so high. "I will turn it down immediately." "Exposure to hot water is a potential environmental danger for residents. Elderly residents and residents with mental and physical disabilities may have neurological conditions that prevent instant recoil from hot water. Because these individuals do not instantly react to dangerous temperature levels, they are at particular risk for injury. Hot water can cause scalding, e.g., second and third degree burns in which the skin blisters and swells. In such instances, skin does not return to normal and forms scar tissue upon healing. These burns may lead to permanent disability." (DQA Publication-01942, Hot Water Temperatures in Adult Family Homes, August 2017.)	M 570
