| S8032                                                      | IPC Life Safety - Int'l Plumbing Cod<br><br>This State Rule and Regulation is not met as evidenced by:<br>Based on observation and staff interview, the facility failed to maintain the existing plumbing systems in a manner that is in accordance with the WDH Chapter 3 Construction Rules and Regulations for Healthcare Facilities, in accordance with the original design, and in a safe and sanitary condition. The findings were:<br><br>1. Observation of the Housekeeping Closet on 03/25/15 at 2:00 PM and the Kitchen Utility Sink at 2:15 PM revealed that a hose connection to the wall-mounted chemical dispensing system had been installed without a means of backflow prevention. The chemical dispensing system was connected to the faucet discharge via a hose connection which had the ability to be under constant pressure. This can disabled the atmospheric vacuum breaker creating a potential means for cross connection. The Facility Administrator at the time of the observations acknowledged that the connection was not provided with an acceptable means of backflow prevention.<br><br>2. Observation of the Emergency Eyewash Station located in the kitchen on 03/25/15 at 2:20 PM revealed that tepid water was provided to the eyewash via an ASSE 1071, however the valve |                                                                                             | S8032                                                                  | <b><u>S8032</u></b><br><br>The facility's maintenance department will be contracting a plumber to (1) install the required backflow devices throughout the building and (2) assess the needs of the Emergency Eyewash Station by 04/18/14.<br><br>Management will verify, with licensed contractor, the items cited in S8032 meet all current plumbing code requirements. | 4/18/15                                                |
