Both residents required assistance with ambulation and resident #8 required repeated direction to find his/her table or room. In addition, the room for resident #8 was the only door in the facility with the resident's name indicated on it.</p> <p>2. Review of the medical records showed resident #4 had diagnoses which included cardiac arrhythmia with pacemaker, hypertension, osteoarthritis, and major recurrent depressive disorder. The following concerns were identified:</p> <p>a. Review of a progress note dated 3/15/22 and timed 9:30 AM showed "Resident came down for breakfast this morning. [S/he] was able to ambulate independently. [S/he] doesn't remember falling last night or going to the ER."</p> <p>b. Review of an "alert charting note" dated 3/12/22 and timed 9 AM showed "CNA alerted to side entrance door being open. [S/he] responded quickly to find that resident had eloped outside the building into the paved alley behind the building. [S/he] was able to reorient [resident] and get [resident] to come back towards the building. However, while [resident] was stepping up onto the curb from the pavement, [resident] mis-stepped and fell. Resident began bleeding from forehead above right eyebrow as well as from several spots on arms. [Resident] also broke glasses. CNA remained with resident while nurse went to call 911."</p> <p>c. Review of a progress note dated 1/19/22 and timed 1:47 PM showed the resident reported that s/he was talking to his/her spouse who died years ago and the spouse was sitting in the room in the chair.</p> | S5047               |                                                                                                                          |                          |
